

# ADOPTIE en INTERVENTION GAME

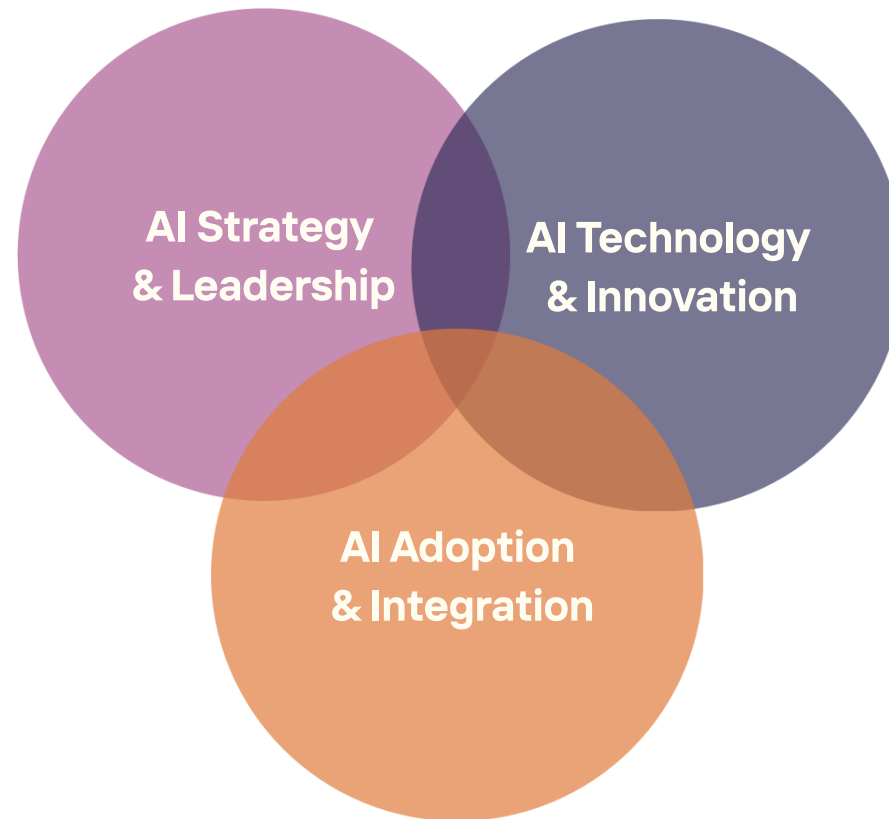

Michiel Ykema

# Vandaag

- Ochtend
- Planning eindgesprekken
- AI Adoptie
  - Het belang van adoptie
  - Psychologische barrières bij verandering
  - Taboes – rondom AI
  - Neurowetenschap en verandering – praktische principes
- De weg naar de toekomst (deel 2)
- Middag: The Transformation Intervention Canvas<sup>©</sup>

# AI en Adoptie

# Gevolgen van ontbreken van adoptie (een greep)

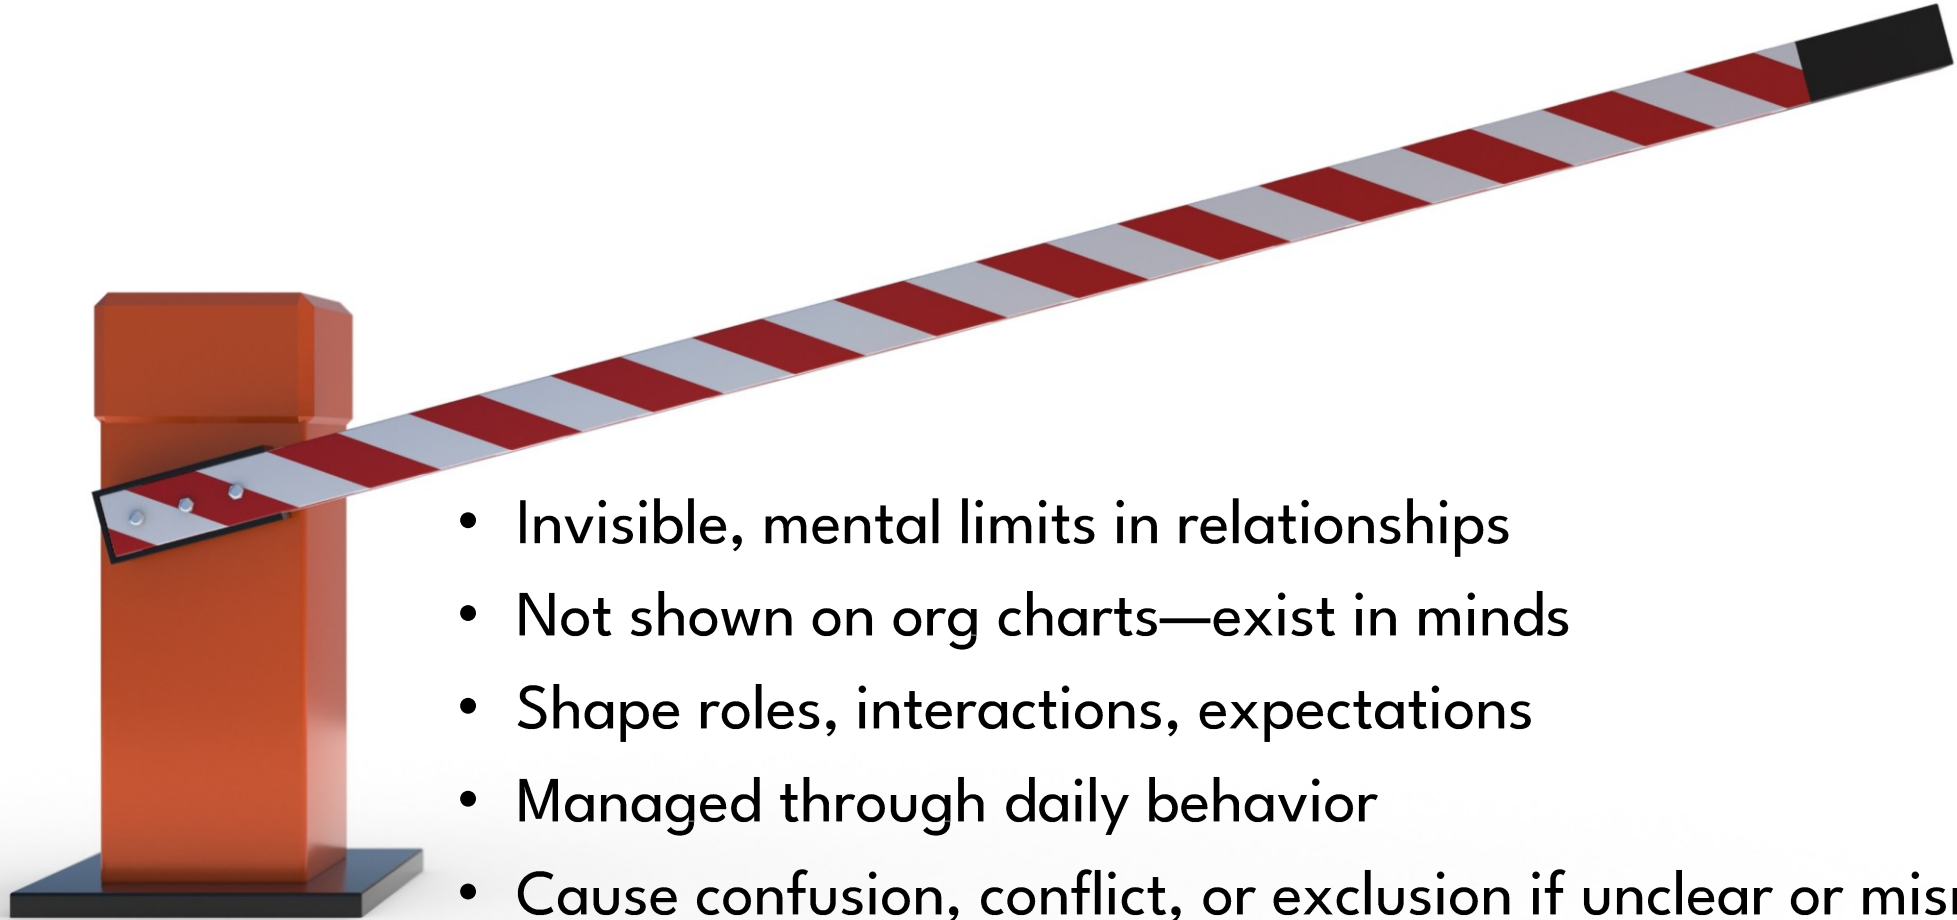

- Onrealistische verwachtingen
- Geen visie
- Gebrekkige gebruikersinbreng
- Onvoldoende vaardigheden
- Weinig zicht op nut en impact
- Werken in silo's (weinig samenwerking)
- Geen of vaag eigenaarschap
- Eindgebruiker niet betrokken
- Gebrek aan vertrouwen in AI-uitkomsten
- Onvoldoende uitleg over veranderende rollen/effecten

Wat maakt  
adoptie  
moeilijk?

- Psychologische grenzen
- AI Taboes

# Psychological boundaries to collaboration

- Invisible, mental limits in relationships
- Not shown on org charts—exist in minds
- Shape roles, interactions, expectations
- Managed through daily behavior
- Cause confusion, conflict, or exclusion if unclear or mismanaged

# Who's in charge of What?

## The Authority Boundary

- Defines roles of leadership and followership
- Leaders must remain open to feedback and criticism
- Subordinates must be willing to challenge and inform superiors
- Problems arise when authority is too rigid or too absent

"I said my door is always open. I never said you were allowed to walk through it."

# Who is—and isn't—"us"?

## The Identity Boundary

- Defines group membership and sense of belonging
- Can motivate and energize
- Strong identity can create “us vs. them” dynamics
- Challenge is fostering pride without devaluing others

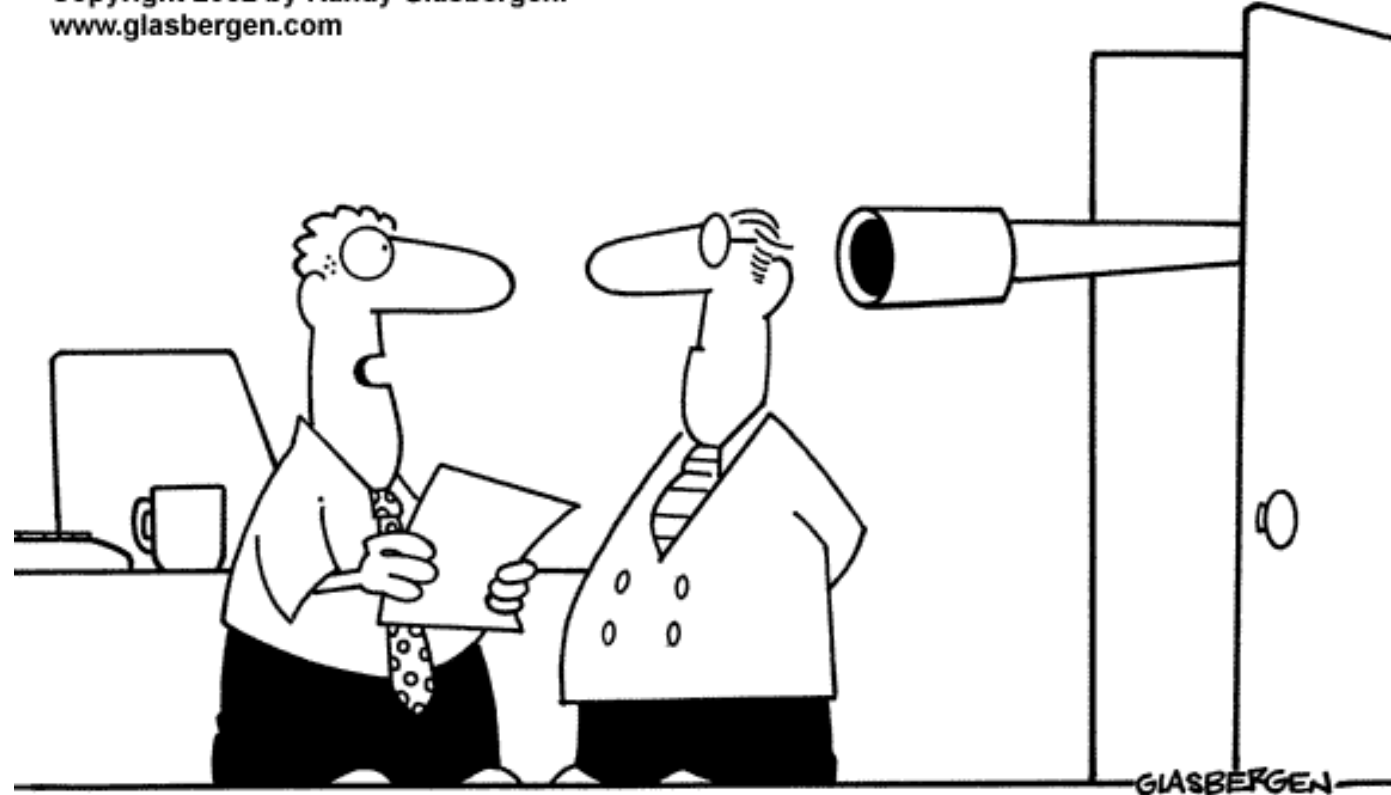

" Are we US or THEM ? "

# What's in it for us?

## The Political Boundary

- Reflects distinct interests of different groups
- Involves negotiation and coalition-building
- Poor management leads to exploitation or underrepresentation
- Good management leads to empowerment and fairness

Copyright 2002 by Randy Glasbergen.

**"We need to reach an agreement on the thermostat settings.  
The cold people have declared war on the hot people!"**

# Who does what?

## The Task Boundary

- Concerns division of labor and responsibility
- Individuals must specialize and collaborate
- Clear task boundaries ensure responsibility and connection
- Unclear boundaries cause incompetence or disconnection

# Working with the Boundaries

- You are an alien from a highly rational species
- You just returned from a collaboration project on Earth
- The humans said all the right things - but acted very differently
- Your mission: document the contradictions and surprises you observed
- Use short, sharp examples - and feel free to exaggerate
- Humor helps reveal what's really going on beneath the surface
- Choose one of these simple formats to report your findings:
  - They said... / They really meant... / Boundary
  - I expected... / But I saw... / Boundary
  - It looked like... / But it felt like... / Boundary
- Use Post-Its to put your outcomes on the large sheets

# Redenen waarom mensen AI niet omarmen

- AI lijkt vaak een 'black box': Mensen missen uitleg, transparantie en grip.
- AI wordt gezien als emotioneel: Gebrek aan empathie of menselijke nuance.
- AI lijkt star en inflexibel: Angst voor standaardoplossingen, geen ruimte voor uniekheid.
- AI is te autonoom: Gevoel dat controle en regie uit handen glijdt.
- Menselijk contact wordt gemist: Voorkeur voor direct contact boven interactie met een machine.

# Niveaus van 'ongemak'

- Persoonlijke voorkeuren in werkstijl: Liever bekende, vertrouwde routines.
- Samenwerking & rolverdeling: Fricties binnen teams over gebruik van AI.
- Vertrouwen & eerlijkheid: Bezorgd over bias, transparantie en rechtvaardigheid.
- Baanzekerheid & rol: Angst voor baanverlies of grote verandering in functie.
- Organisatorische stabiliteit: Zorgen over risico's voor de hele organisatie of keten.

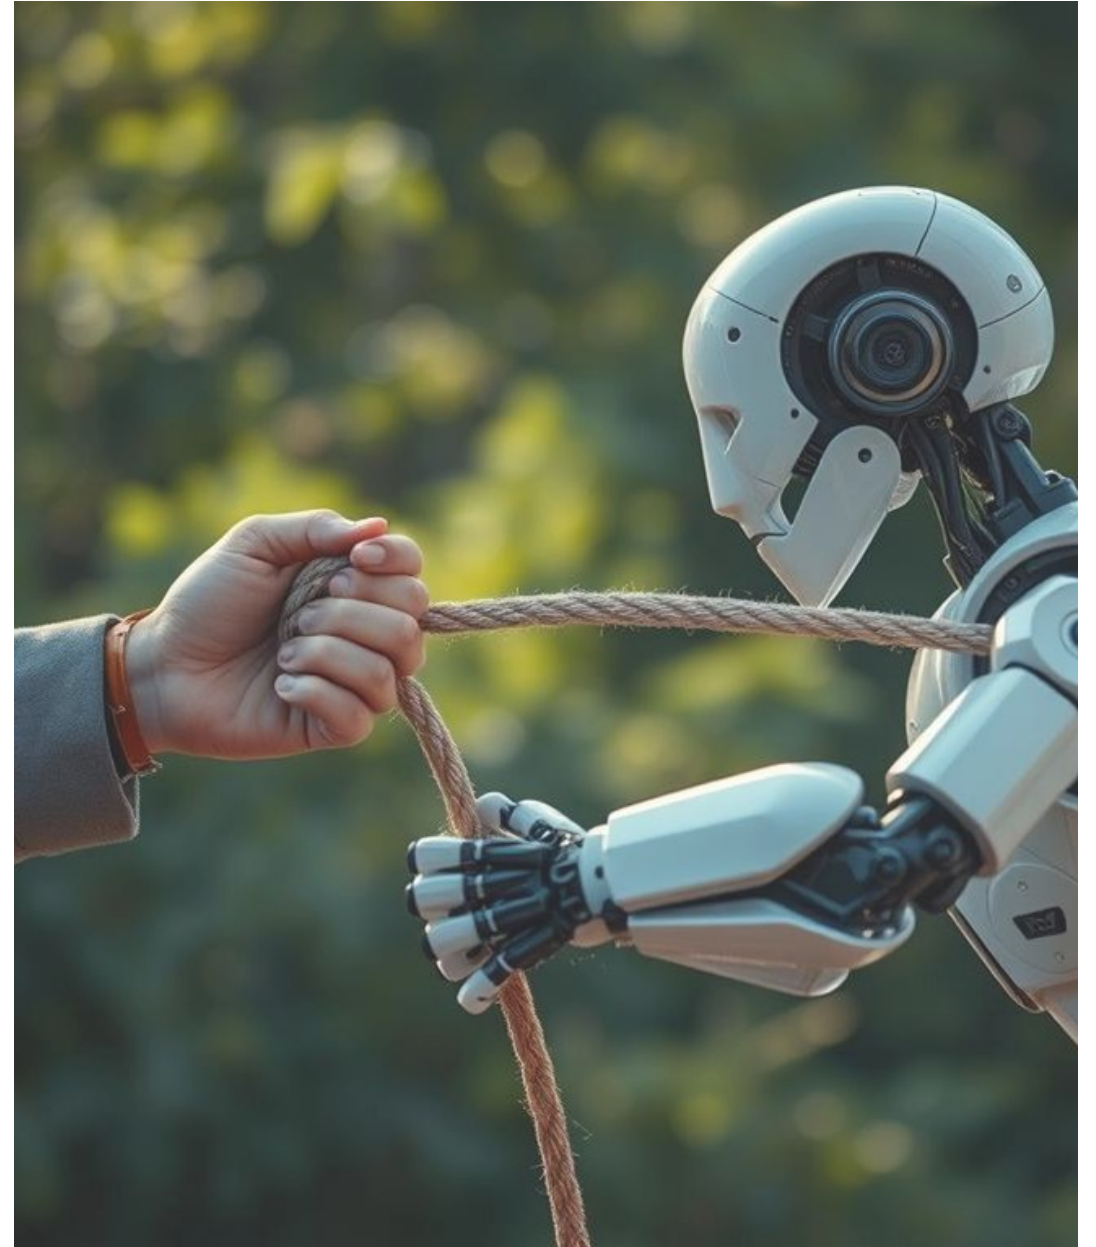

# Taboos – The Unspoken Barriers to Innovation

- **Taboos** are social or cultural prohibitions
- **Taboos** reflect what we hold true – unconsciously
- **Taboos** are not necessarily logical
- **Avoidance of taboos** stifles creativity and innovation

# Taboos in Innovation: Tech & AI Adoption

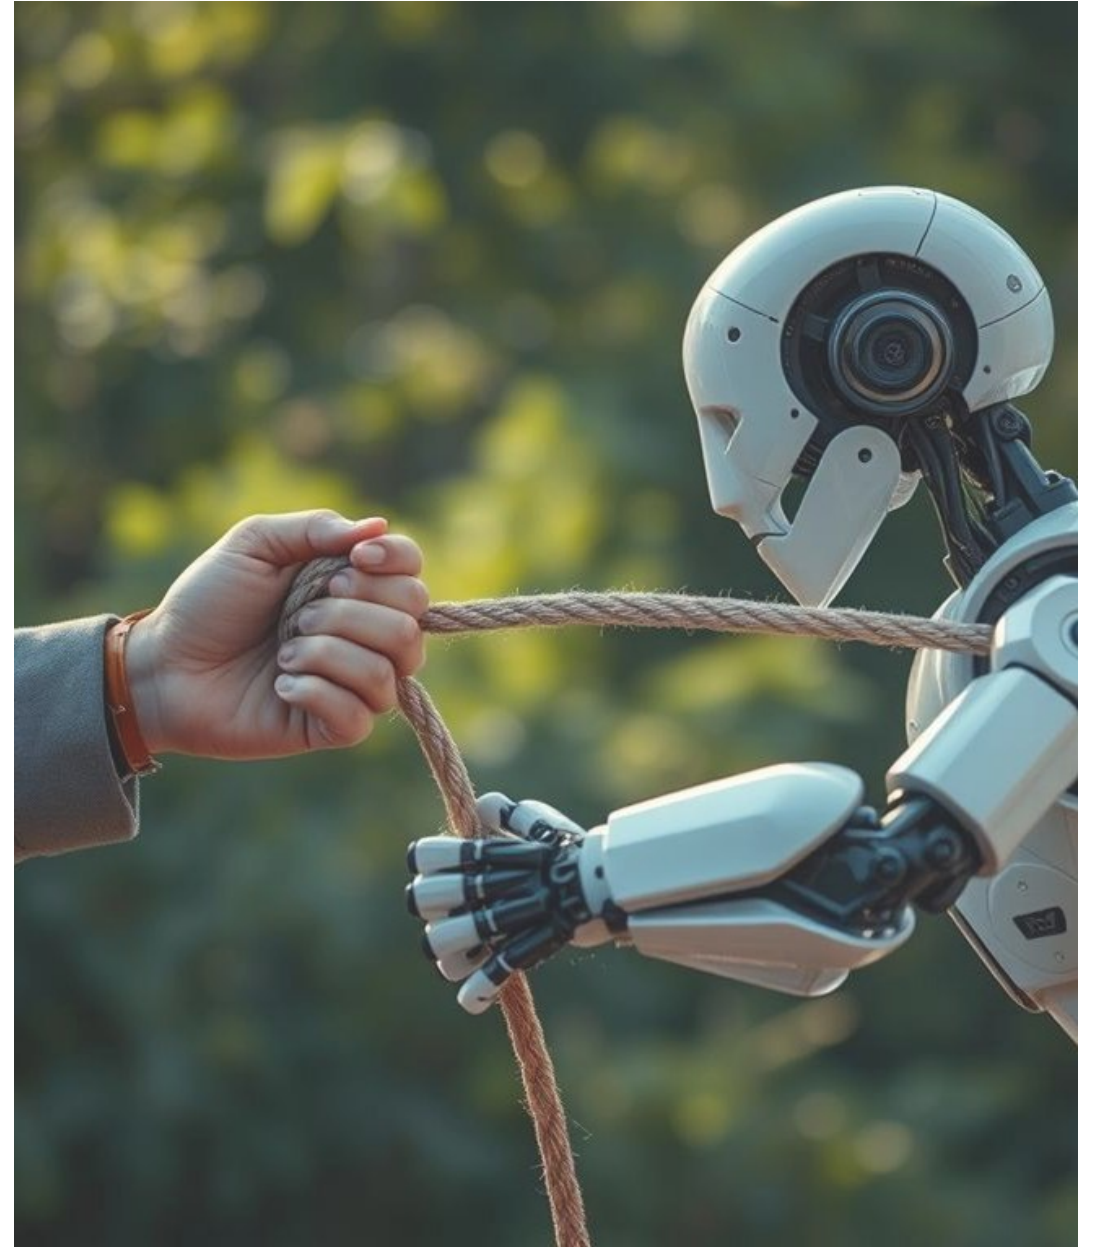

We're supposed to love AI, but...

# Taboos in Innovation: Tech & AI Adoption

We're supposed to love AI, but...

1. What if you don't understand it?
2. What about human interaction?
3. Does AI come to fair decisions?
4. Will AI take over my job?
5. Can we understand the full impact?

# Periodic Table of AI Taboos

# Categories of AI Taboos

Based on the Periodic Table of AI Taboos

|                                                                                                                                                     | <br>AI is too Autonomous | <br>AI is too Inflexible | <br>AI is Emotionless | <br>AI is too Opaque | <br>People prefer Human Interaction |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>Level 1</b><br>Personal Workflow Preferences<br>                | The Intrusive AI                                                                                          | The Unadaptive AI                                                                                           | The Uncaring AI                                                                                          | The Confusing AI                                                                                        | The Aloof AI                                                                                                           |
| <b>Level 2</b><br>Collaboration & Role Adjustments<br>             | The Redefining AI                                                                                         | The Forcing AI                                                                                              | The Distant AI                                                                                           | The Obscuring AI                                                                                        | The Separating AI                                                                                                      |
| <b>Level 3</b><br>Professional Trust & Fairness Issues<br>         | The Unjust AI                                                                                             | The Constricting AI                                                                                         | The Callous AI                                                                                           | The Hidden AI                                                                                           | The Separating AI                                                                                                      |
| <b>Level 4</b><br>Career Security & Job Redefinition Anxiety<br> | The Threatening AI                                                                                        | The Stagnating AI                                                                                           | The Devaluing AI                                                                                         | The Unknowable AI                                                                                       | The Replacing AI                                                                                                       |
| <b>Level 5</b><br>Organizational Stability at Risk<br>           | The Uncontrolled AI                                                                                       | The Brittle AI                                                                                              | The Dehumanizing AI                                                                                      | The Risky AI                                                                                            | The Undermining AI                                                                                                     |

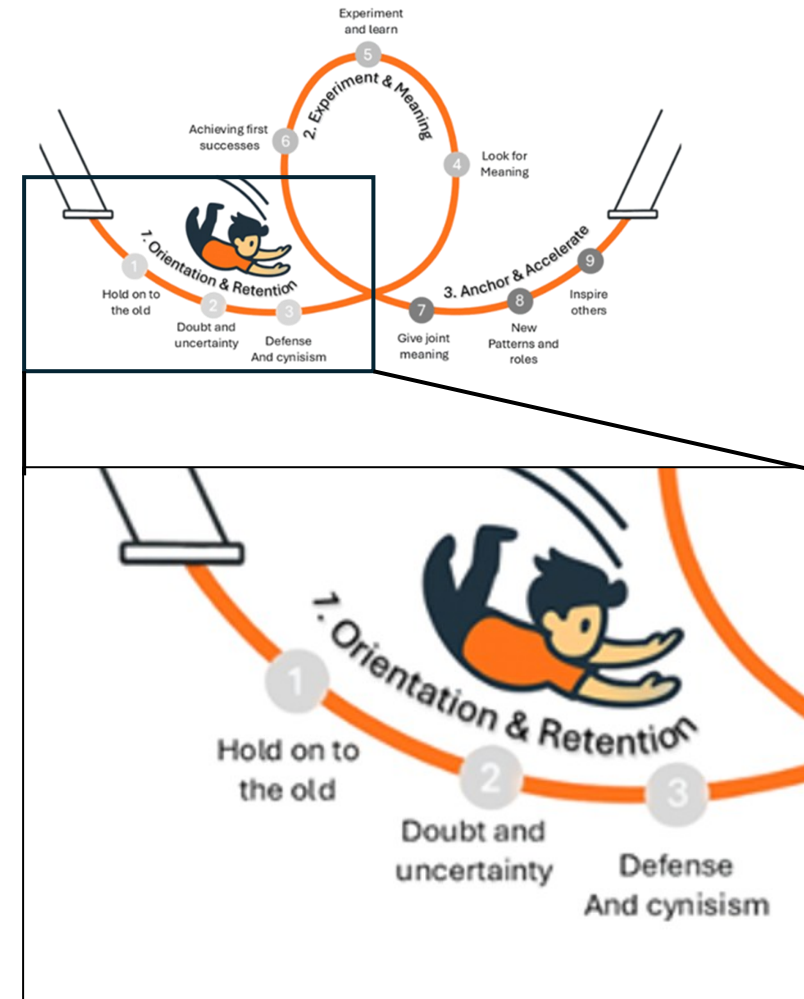

# OMGAAN met VERANDERING

## Adoptiefases

# Orientation & Retention

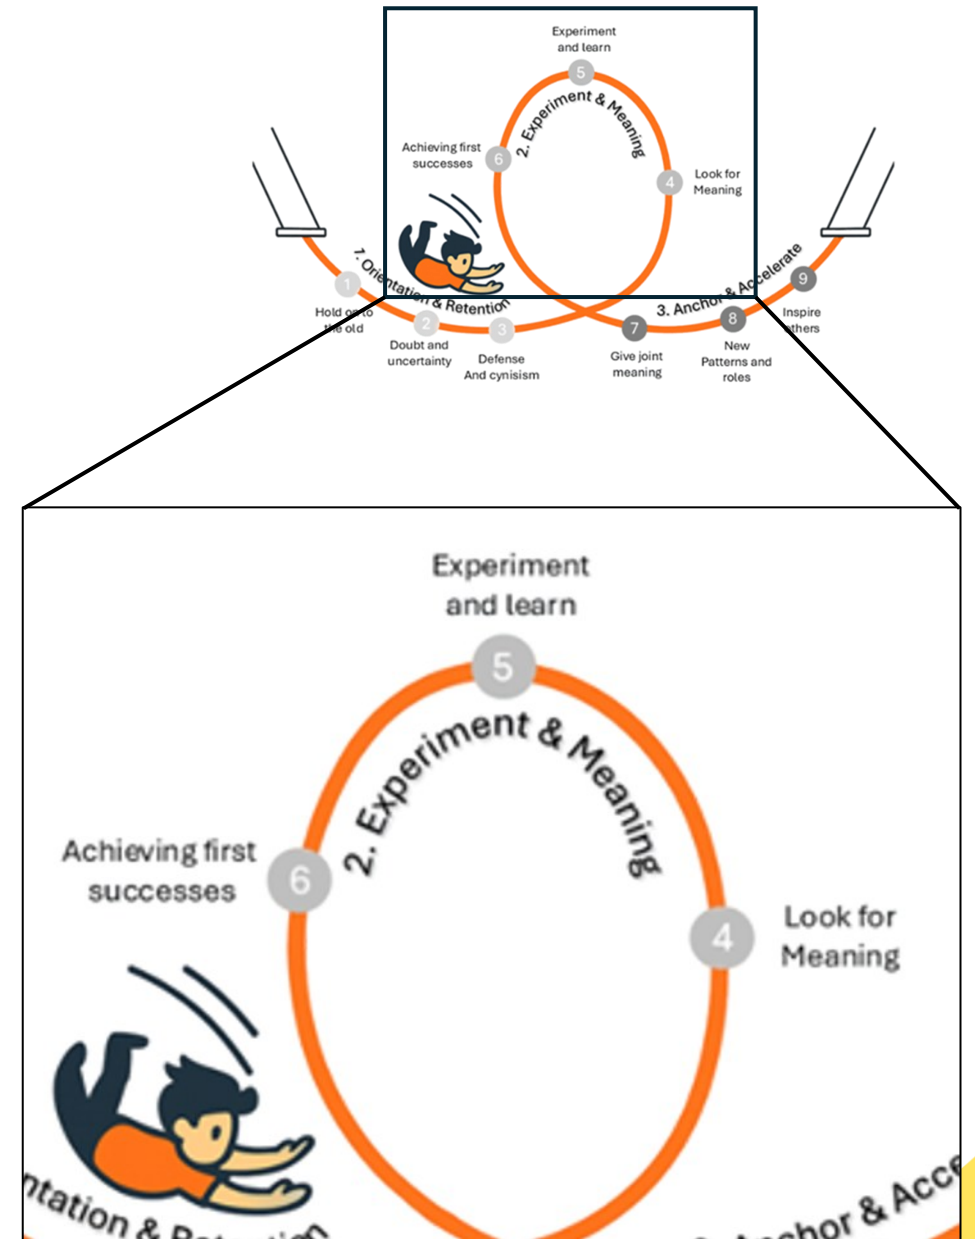

- Early fears that AI will replace jobs or take over roles without consultation. This plays out at the level of job & role security, when people feel that AI is too **autonomous** and that they are losing control over their work.
- At the same time, there is uncertainty about the future of the organisation, especially when AI seems too **opaque**: here, the discomfort plays out at the level of organisational stability.
- If people also feel that AI does not fit in with their own ways of working, AI becomes too **inflexible** is cited as an objection, especially at the level of personal work preferences.

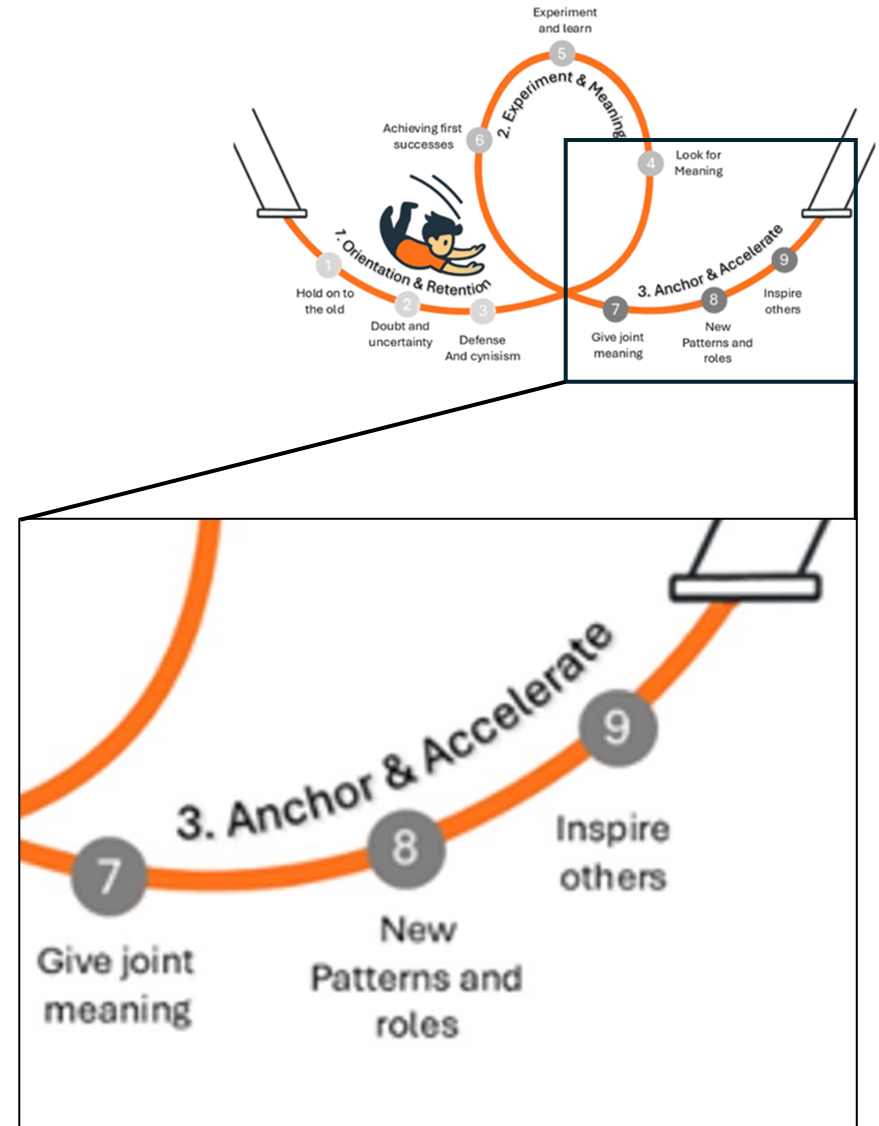

# Experiment & Meaning

- Experiments that reveal that AI can come across as **emotionless**, and therefore lacking in social nuance. This objection often arises at the level of collaboration & role dynamics.
- When AI outcomes are too inflexible and leave little room for nuance, people experience AI as **too inflexible** at the same level of trust and honesty.
- At the same time, teams in this phase are looking for ways to combine technology and culture; if **people prefer human interaction**, tension arises at the level of organisational stability – because they see the culture being threatened.

# Anchor & Accelerate

- Employees want permanent control over AI decisions and feel AI being **too autonomous** as an important issue at the level of personal work preferences.
- Once AI is rolled out more widely, complexity can once again give rise to mistrust, especially if AI remains **too opaque** in terms of trust and fairness.
- At the same time, the **preference for human interaction** remains a point of attention: appreciation for personal contact and cultural values plays precisely at the level of job & role security.

A person wearing a hat and a patterned shirt stands precariously on a tall, narrow stack of books. They are holding a large, rolled-up scroll or document. The stack of books is composed of many thin, light-colored volumes, some with blue spines. The background is a vast, open landscape under a cloudy sky, with distant mountains visible on the horizon.

# Neuroscience to promote learning and change

# Creating habits - small steps

## In theory

Where habits form, behaviour becomes part of a structure

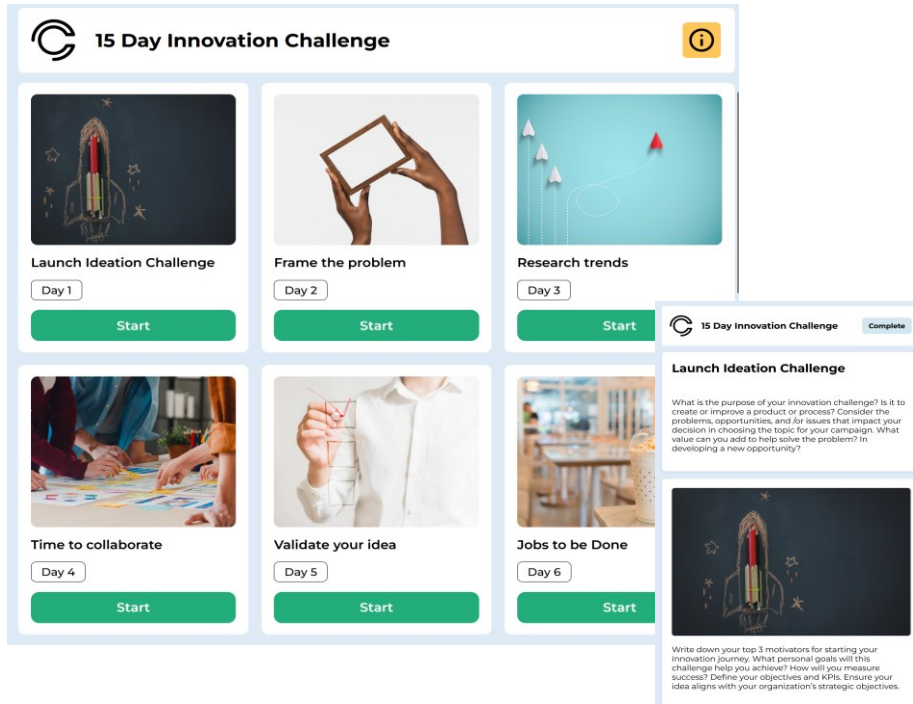

Offering ways to act – in however small a way – prevents the '*waiting room principle*'

*Flow theory.* Engagement and satisfaction increase when you are immersed in an activity that is challenging yet manageable

# Creating habits - small steps

In practice: 30 Day Challenges

- Digital or physical sets of daily assignments
- Each assignment takes limited time
- Topics include Innovation, Team Cohesion, Sustainable Development Goals, Core values, ...

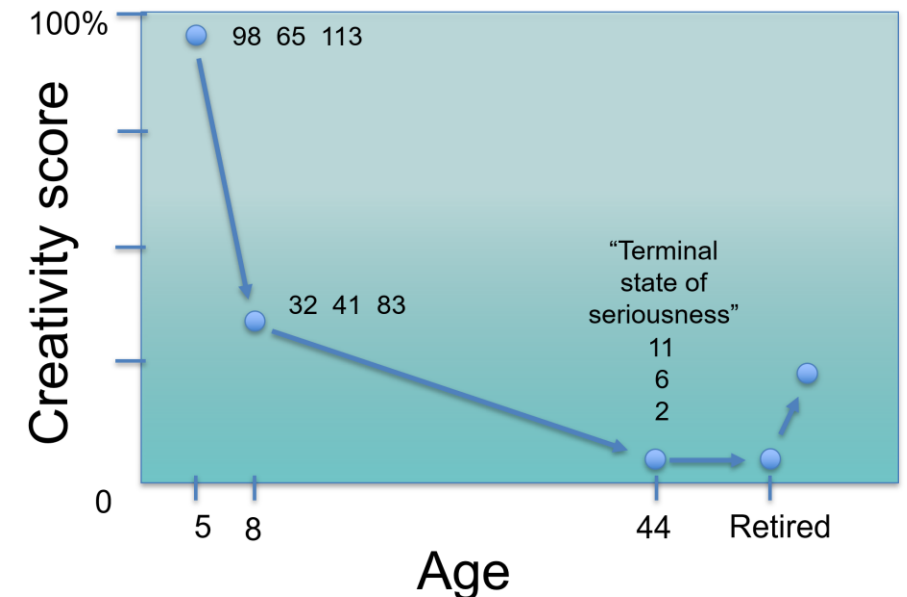

# Playfulness and gamification

## In theory

*Play theory* suggests that play is an essential aspect of human behavior that promotes creativity, exploration, and experimentation.

Introducing playfulness, organizations encourages innovation, risk-taking, and adaptive problem-solving.

Gamification can facilitate *social learning*: observe and learn from others, collaborate on tasks, and receive social recognition and support.

Go to [app.companychallenges.com/Kr6BQKT](http://app.companychallenges.com/Kr6BQKT) or scan the QR Code for access to the assignments. You'll find more background information there. Scratch one area of the scratch card every day to find the password for your daily assignment.

This 15 Day Team Cohesion Challenge is a shortened version of our complete Cohesion Challenge that offers up to 75 assignments for different aspects of team cohesion.

We offer this and other culture, creativity and a bespoke challenge.

| Day 11 | Day 12 | Day 13 | Day 14 | Day 15 |

Powered by  
Playbook Toolkit

# Playfulness and gamification

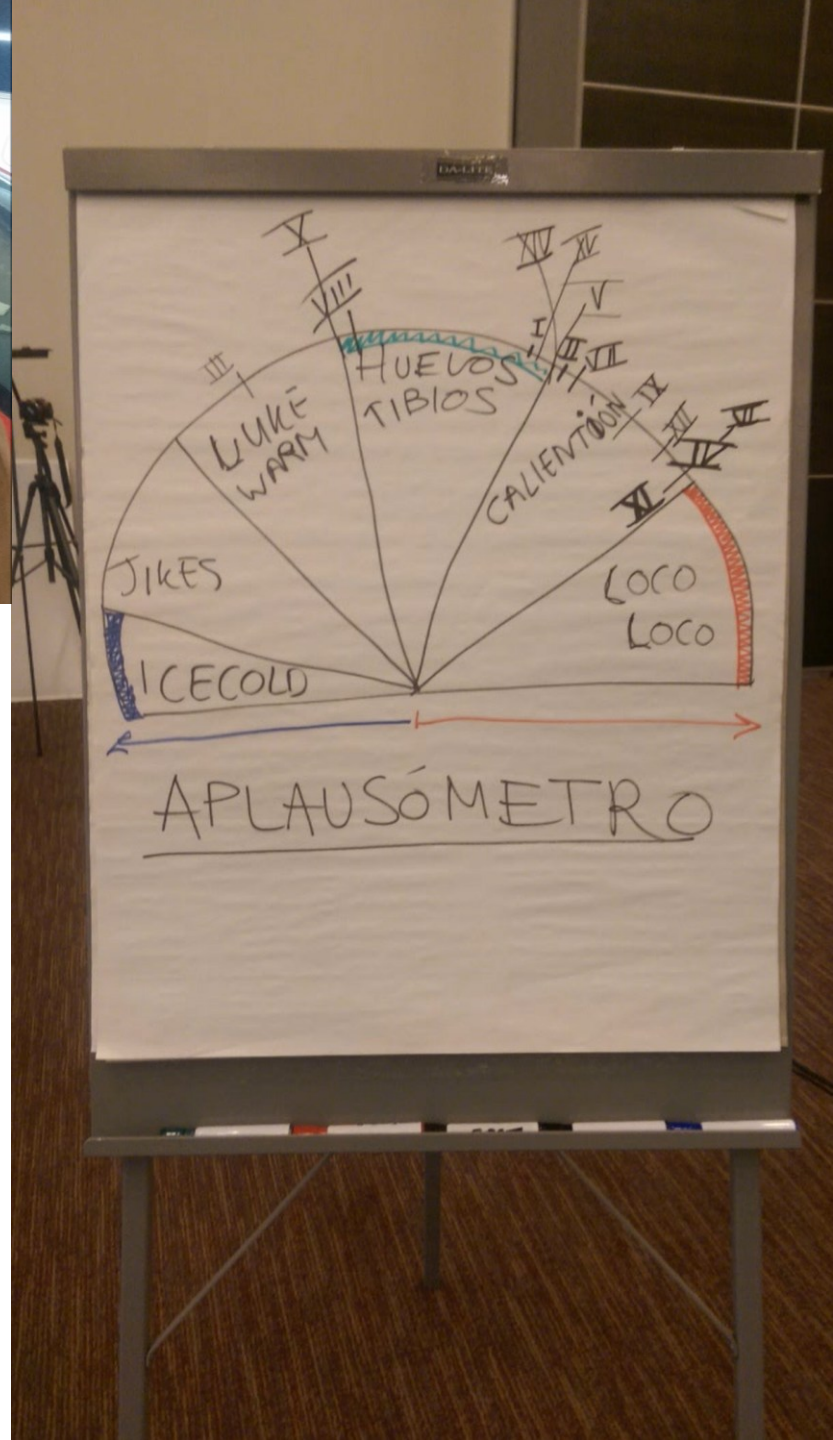

## In practice: Game Play

- Varies from providing a scratch card, and 'traditional' games to gameplay events and pub quizzes
- Including award ceremonies adds to the fun!

# Immersion

## In theory

Being involved more deeply in activities, themes or environment has advantages on aspects like:

- activating reward pathways
- enhancing learning and memory
- increasing attention and focus
- fostering emotional engagement and empathy
- promoting neuroplasticity

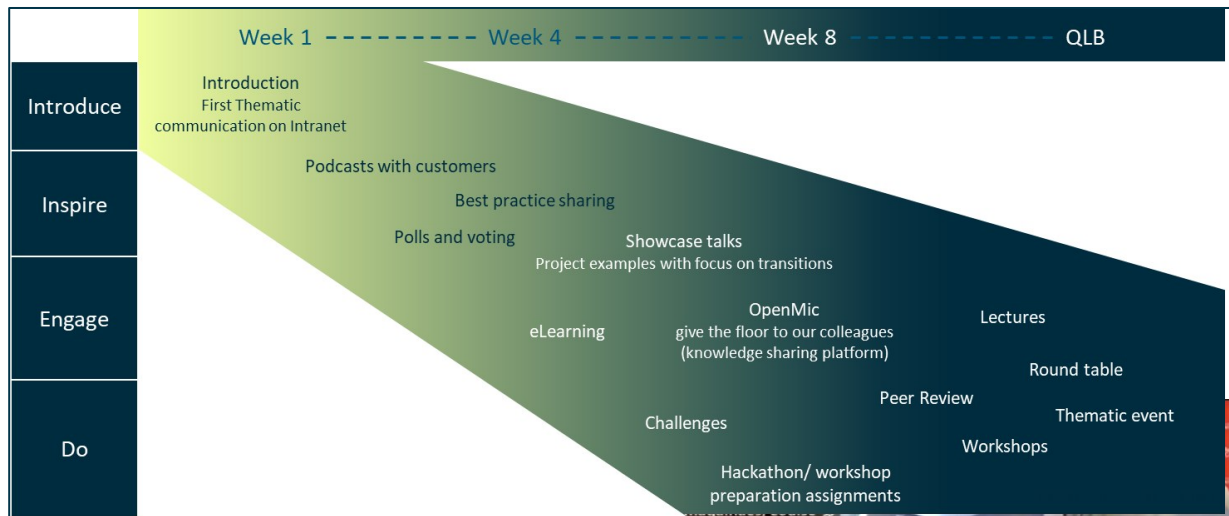

This makes initiatives that more effective engaging, memorable, and conducive to sustained behavioral change

# Immersion

## In practice: Learning Bootcamps and Learning Weeks

- Putting a specific theme (skill, value) in the spotlight over a certain period
- Different activities with growing intensity of participation
- Live/online/hybrid, Glocal

For the sake  
of fuck stand  
on the right

No trampolines  
on the tube  
please

Midgets must  
be hugged at  
all times

Dogs. Bring more  
Dogs. Dogs are  
awesome.

Go smoke in a  
bus stop like  
the other  
wankers

## Controlled disobedience

### In theory

Disobedience helps challenge the status quo and supports a questioning mindset

Disobedience opens roads to alternative solutions and innovation

Empower individuals to take ownership and feel responsible – agency

Offers an opportunity for dialogue between hierarchical levels

Always be yourself.

Unless you can be  
a unicorn.

Then always be a unicorn.

Want a robot?  
We have many  
different models  
to choose from.  
Contact us today.

A collage of various posters and signs. At the top left, a sign says "I am not a robot" with a robot icon and a quote from a person who works mechanically without thinking. To its right is a large "SMILE!" sign with a wide-eyed, grinning yellow face. Below the "I am not a robot" sign is another that says "As long as everything is exactly the way I want it, I am totally flexible." with icons of a person sitting, standing, and running. To the right of that is a sign that says "It makes your boss wonder what you have been up to." with a target icon. Below the "SMILE!" sign is a sign that says "REDUCE YOUR STRESS" with a target icon. At the bottom center is a large target icon with the text "HIT HEAD HERE" below it. To the right of the target is a sign that says "IF YOU'RE WAITING FOR A SIGN" with a sign icon. At the bottom right is a sign that says "CEASE TO RISK" with a sign icon. There are also other signs visible, such as "TH", "CEASE TO RISK", and "HIT HEAD HERE".

# Predefined processes

## In theory

Predefined processes, tools and checklists can reduce cognitive load allowing people to focus on effective execution

Reference points for key steps support working memory function

Set processes, including checklists, support procedural learning and promote skill retention

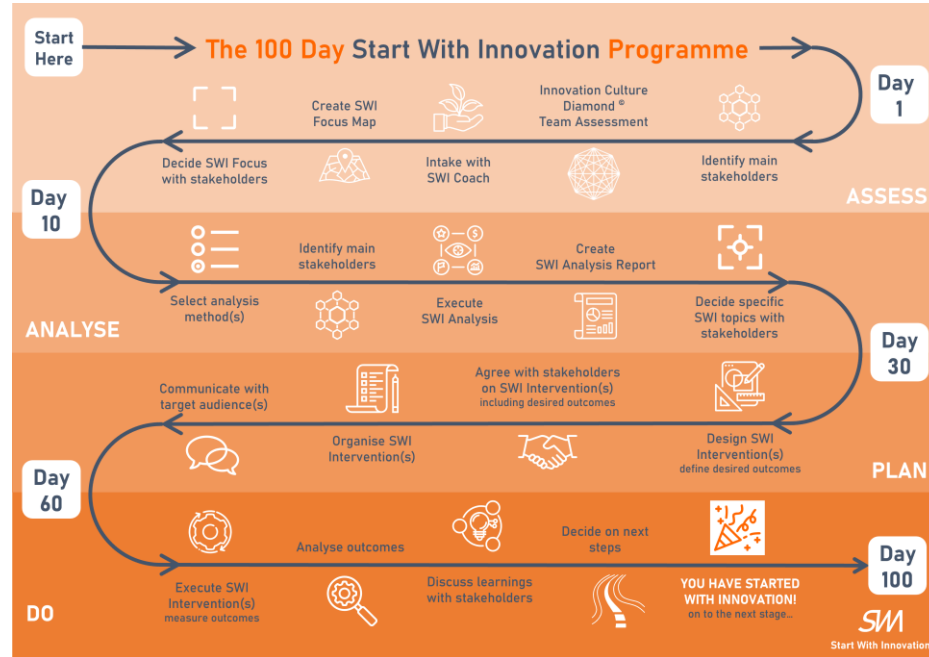

A clearly outlined path reduces decision fatigue

## In practice: Start with Innovation

# Start With Innovation

- Breaking up a process in manageable steps
- Providing step-by-step instruction
- Easy-to-use tools

Overview

Introduction to the 100 Day Start with Innovation Programme

Phase 1 - Assess

Phase 2 - Analyse

Introduction to Phase 2

Step 1 - Select analysis method

Step 2 - Identify main stakeholder

Step 3 - Execute Start with Innovation

Host  
Michiel Ykema

## Step 4 - Create

One of the main uses for the Innovation Canvas is to focus your efforts on during the project. The outcomes of the assessment and your project plan are used to create the Focus Map.

Watch the video for an explanation how to create the Focus Map.

You download the focus map below (xlsx)

SWI Focus Map.xlsx

# Step 4 - Create SWI Focus Map

One of the main uses for the Innovation Culture Diamond® Assessment is to find the area you want to focus your efforts on during the programme. To find a specific area, you can use the outcomes of the assessment and your professional judgement, using the Start with Innovation Focus Map

Watch the video for an explanation how the focus map works.

You download the focus map below (.xlsx)

|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Dimension</b>                              | Choose the Dimensions that score lowest, second lowest and most diverse on the Innovation Culture Diamond® Assessment from the list                                                                                                                                                                                                                               |
| <b>Chosen dimension</b>                       | Choose the Dimension you chose to focus on in step 1 from the list in order to find the underlying aspects                                                                                                                                                                                                                                                        |
| <b>Aspect</b>                                 | Select the aspect of your chosen dimension from the list in the appropriate row                                                                                                                                                                                                                                                                                   |
| <b>Score</b>                                  | Copy the scores of each dimension from Innovation Culture Diamond® Assessment report                                                                                                                                                                                                                                                                              |
| <b>Changeability</b>                          | Some things will be easier to change than others in your organisation. From your <b>professional judgement</b> , assess whether this dimension will be relatively easy to change - <b>positive</b> - relatively hard to change - <b>negative</b> - or <b>neutral</b>                                                                                              |
| <b>Link with other projects</b>               | Innovation will be one of several topics on your organisations agenda. From your professional judgement, assess whether this dimension will be supported by other projects - <b>positive</b> - clash with other projects - <b>negative</b> - or not be impacted much by other projects - <b>neutral</b>                                                           |
| <b>Preferred Starting Dimension or aspect</b> | Based on the outcomes of the Innovation Culture Diamond® Assessment and your professional judgement, this is the preferred dimension to start working on. Should different dimensions have the same score - and be marked as preferred starting dimensions - use your professional judgement and stakeholder feedback to decide on the dimension to start work on |

# Perspective taking and dialogue

## In theory

Dialogue when faced with difficult decisions requires a *flexible cognitive stance* and consider alternative viewpoints.

When people seek common ground and engage in dialogue with others, they recruit neural circuits that help them to understand diverse perspectives and generate creative solutions to complex problems

Dialogue increases inhibitory control and allows constructive collaboration in the face of disagreement or conflict

# Perspective taking and dialogue

## In practice: Trilemma

A simple format that 'forces' people to choose two out of three options

People position themselves on the board physically

Adding scenarios – What if..., Look through the eyes of... - helps looking from other points of view

Two out of three feels more 'reasonable' than one out of two

Everybody agrees on at least one point – less polarisation

Very easy to use – we see clients develop a habit of using it more often

Physical shape promotes active participation and commitment to choices

# Praktijk: Barco Adoption Challenge

- Microdoelen en snelle feedback: Kleine, dagelijkse opdrachten houden de hersenen actief en verlagen drempels tot nieuw gedrag.
- Spel & nieuwsgierigheid: Fysieke scratchcards activeren het brein via speelse prikkels en beloning.
- Stapsgewijze gewenning: Oefeningen gericht op gewenning, herhaling en experimenteren verankeren nieuwe routines.
- Sociale veiligheid & leren: Ambassadeurs creëren een klimaat van peer-support, waarin fouten maken en leren normaal is.
- Succeservaringen vieren: Prijzen, verhalen en groepsmomenten geven dopamine-kicks, waardoor verandering beklijft.

# LUNCHOPDRACHT – De Weg naar de Toekomst (2)

- Denk kort na over deze vragen:
  - Hoe gebruiken jullie AI (of: Technologie) nu?
  - Waar verwacht je dat AI het meeste invloed gaat hebben?
  - Wat wordt de grootste verandering voor jou?
  - En voor organisaties?
  - En voor de maatschappij?
- Ga in groepjes van 3 uit elkaar
- Film elkaar terwijl je kort (20 – 30 seconden per vraag) antwoord geeft op de vragen
- Maak een los filmpje voor elke vraag in de vorm “Ik gebruik AI nu voor...”, Ik verwacht dat AI het meeste invloed gaat hebben op...” (etc)

Change is

Scary

Easy

Inevitable

Hard – for others (not me)

# But... what *is* a change intervention?

A change intervention is:

- ...

Like each profession, (organisational) change management has it's own jargon. And, like any professionals, we expect others to know what we mean.

We have all been witness to the confusion this creates!

So let's see if we can come to a joint definition of the word 'intervention'

# But... what *is* a change intervention?

We define a change intervention as:

- A **deliberately** chosen
- **Action** – or ‘inaction’
- Aimed at a **target audience**
- With a **defined** (desired) **result**
- To further one or more **specific** change objectives
- (Usually) in **combination** with other interventions

Like each profession, (organisational) change management has its own jargon. And, like any professionals, we expect others to know what we mean.

We have all been witness to the confusion this creates!

So let's see if we can come to a joint definition of the word 'intervention'

# Why use interventions?

Resistance is caused by...

# Resistance is caused by... (O'Toole)

1. **Satisfaction** – People are comfortable with the status quo.
2. **Fear of the Unknown** – Uncertainty about the future makes change intimidating.
3. **Self-Interest** – People worry about losing power, status, or benefits.
4. **Lack of Trust** – Skepticism about leadership motives fuels resistance.
5. **Differing Assessments** – People disagree on whether the change is beneficial.
6. **Low Tolerance for Change** – Some individuals struggle with adapting.
7. **Fear of Failure** – Concern over whether they can handle new challenges.
8. **Poor Communication** – Lack of clarity about the change increases resistance.
9. **Loss of Control** – Feeling powerless in the face of imposed change.
10. **Attachment to Tradition** – Comfort in past practices discourages adaptation.
11. **Selective Perception** – Individuals interpret change based on biases.
12. **Cognitive Dissonance** – The change conflicts with deeply held beliefs.

# Resistance is caused by...

## Individual resistance

1. Satisfaction
2. Fear of the Unknown
3. Self-Interest
4. Lack of Trust
5. Differing Assessments
6. Low Tolerance for Change
7. Fear of Failure
8. Poor Communication
9. Loss of Control
10. Attachment to Tradition
11. Selective Perception
12. Cognitive Dissonance

# Creating a structured approach to change interventions

Change doesn't happen on its own, at least not in a predictable direction. That's why organisations have a long history of creating *change interventions*.

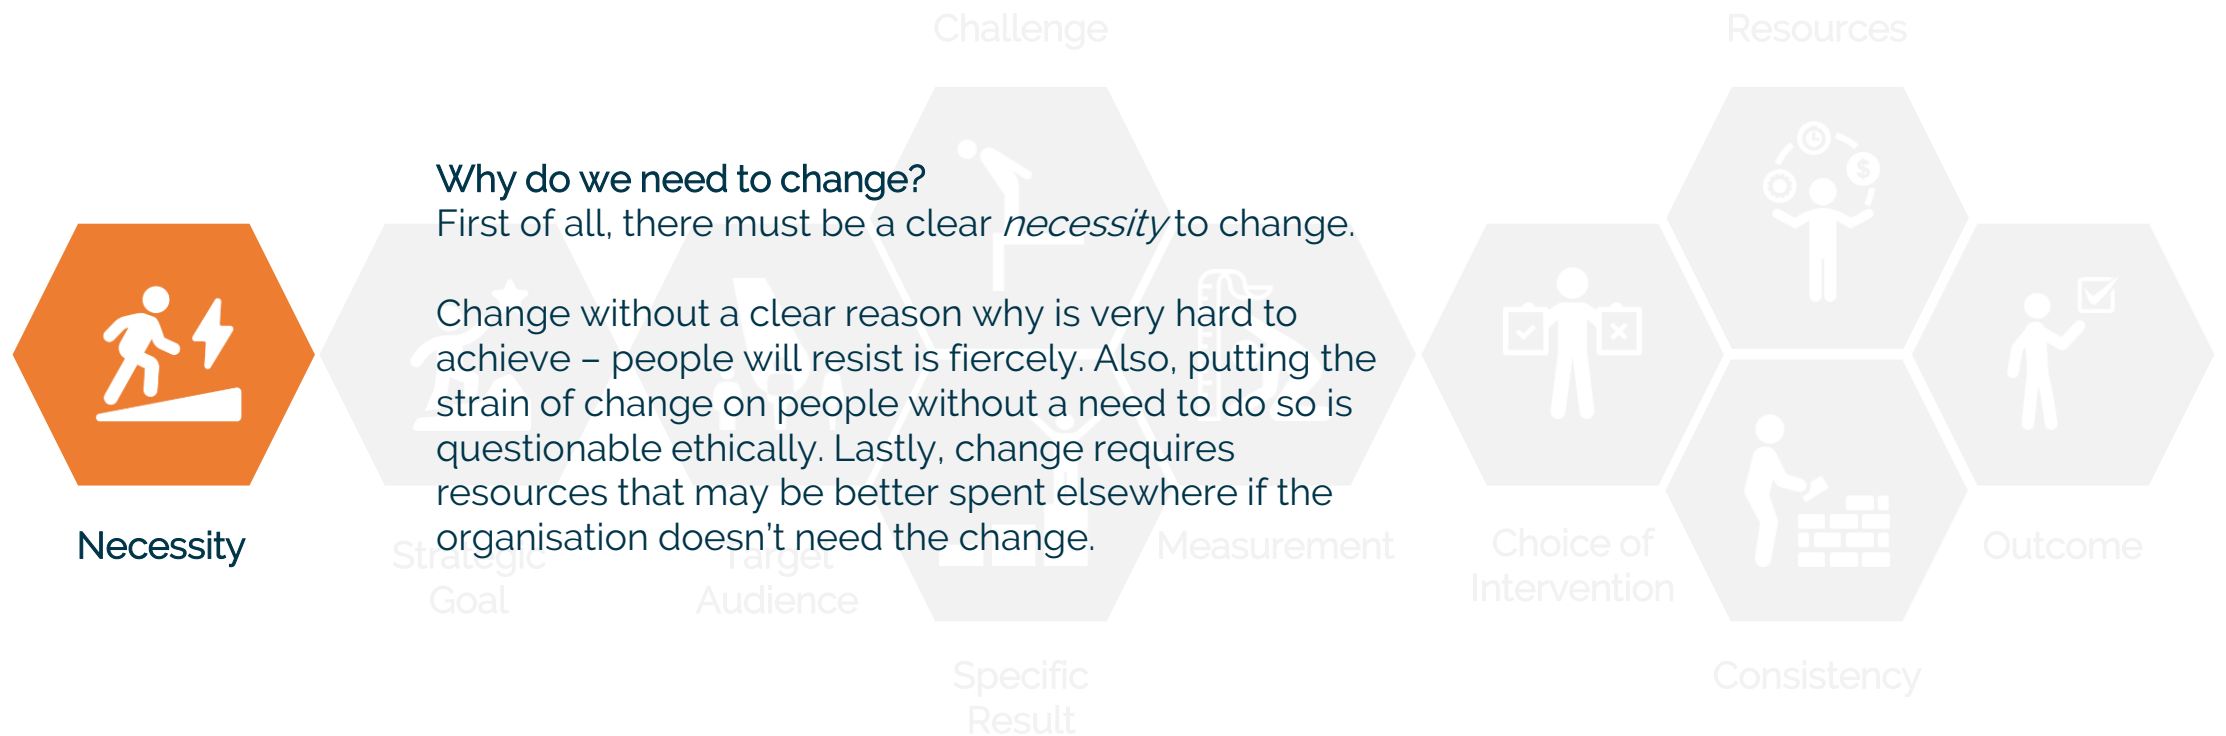

Strangely, though, many change agents treat interventions like an art rather than a business process. And change is one of the foremost processes our businesses are faced with.

So why not create a deliberate process to plan for change and adapt to the outcomes?

## The Transformation Intervention Process ©

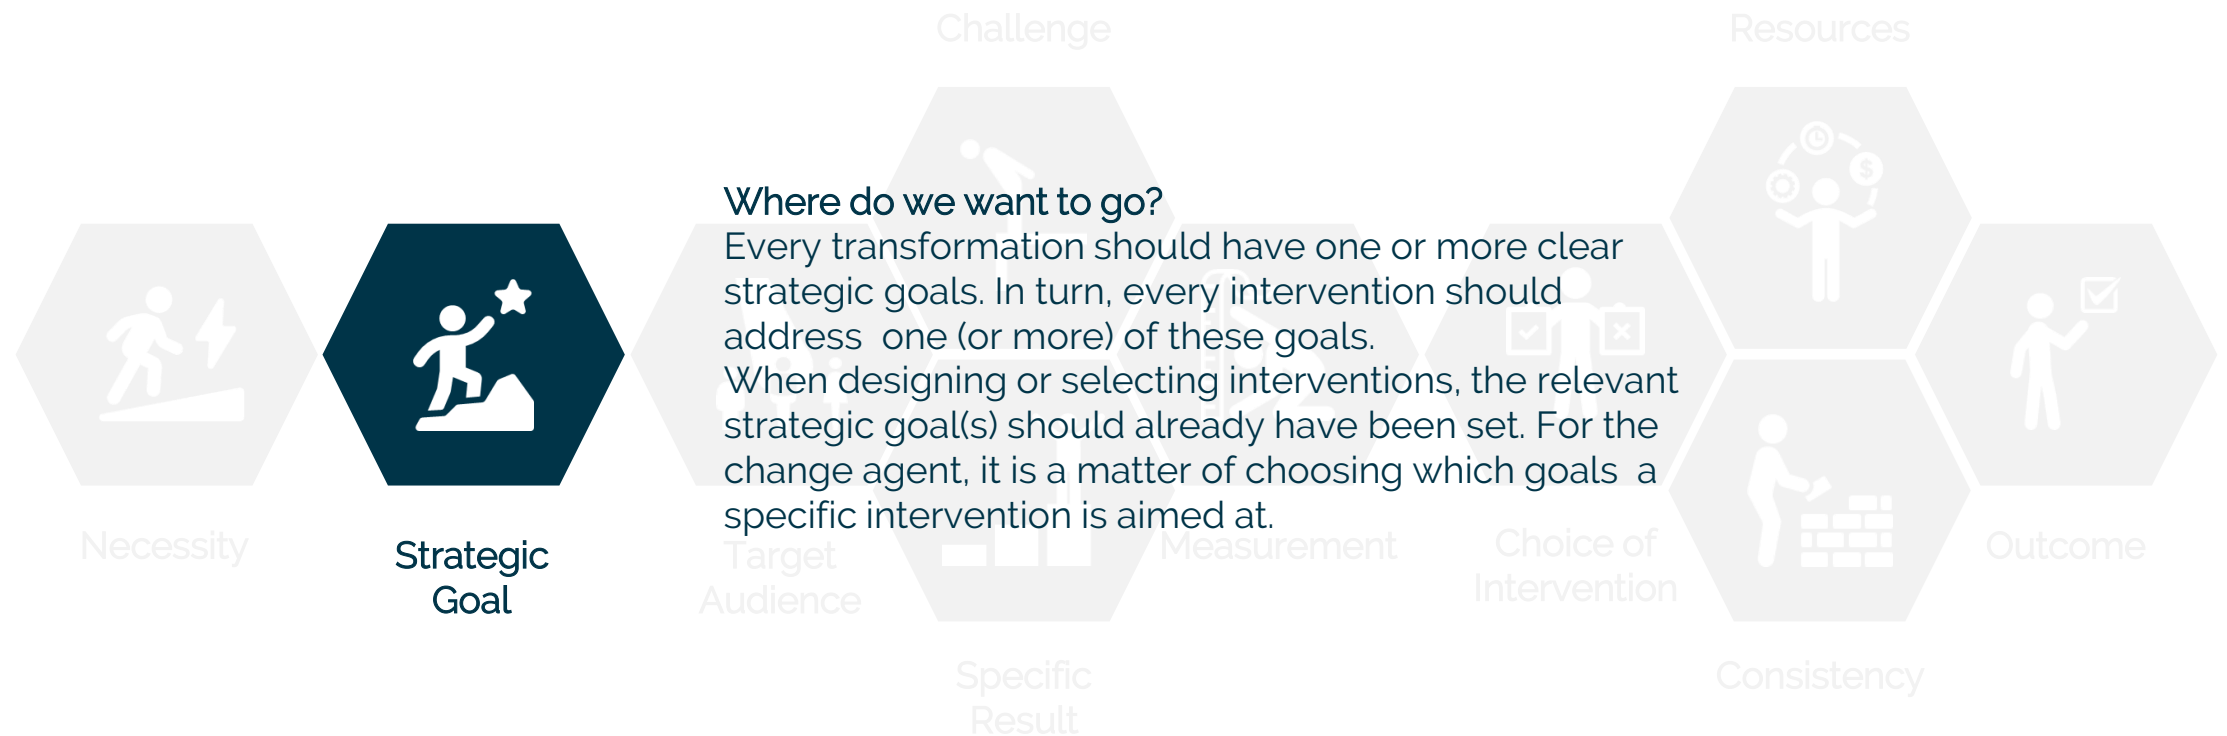

# The Transformation Intervention Process<sup>©</sup> - Step by Step

# The Transformation Intervention Process<sup>©</sup> - Step by Step

1

## STRATEGIC GOAL

- ☐ Efficiency, Cost saving
- ☐ New market, product, Bus. model
- ☐ New / repositioned brand
- ☐ Improved customer experience
- ☐ Agility
- ☐ Innovation
- ☐ Improved quality
- ☐ New methods, systems
- ☐ Better collaboration
- ☐ Forming partnerships
- ☐ Integrating organisations
- ☐ Reorganising
- ☐ Improving employee engagement, social coherence, company pride
- ☐ Improving
- ☐ Divesting / splitting up
- ☐ Sustainable operations
- ☐ New laws or regulations
- ☐ Outside impact
- ☐ Other:.....

# The Transformation Intervention Process<sup>©</sup> - Step by Step

## TARGET AUDIENCE

- ☐ Whole company
- ☐ Specific team, department, BU: ...
- ☐ Company location / office: ...
- ☐ Project team(s)
- ☐ Age group: ...
- ☐ Gender: ...
- ☐ Professionals/ specialists: ...
- ☐ Operations
- ☐ Supporting staff
- ☐ New hires
- ☐ High potentials
- ☐ Top / middle / lower management
- ☐ External partners
- ☐ Customers
- ☐ Country/Continent
- ☐ Innovators
- ☐ Early adopters
- ☐ Early / late majority
- ☐ Laggards
- ☐ Other: .....

# The Transformation Intervention Process<sup>©</sup> - Step by Step

## What do we want to solve?

Every target audience have their own specific challenges in the face of reaching the goals of a transformation. In general, these challenges can be categorised as the (lack of) **ability** to change, the **necessity** to change and **willingness** to change. Underlying each of these factors, a more specific description of the challenge(s) for the target audience is obviously needed.

## Challenge

## Specific Result

## Measurement

## What change do we want to achieve?

Before starting with any intervention, it should be clear what specific change we want the intervention to result in. The specific result should be described in **observable changes** in behaviours, skills and attitudes of the target audience. It describes when we are satisfied with the effects of the intervention.

## How will we know if we succeeded?

When you have decided what result you want to achieve, you need to define how you will determine your success. This means deciding which indicators to use, but also how to measure them.

## Resources

## Choice of Intervention

## Outcome

## Consistency

**3**

## CHALLENGE

- ☐ Low engagement, cynicism
- ☐ Poor skills / knowledge
- ☐ Poor autonomy
- ☐ Poor social skills / networking
- ☐ Poor collaboration
- ☐ Unwilling / unable to change
- ☐ Not used to being challenged
- ☐ Lack of urgency
- ☐ Potential job loss
- ☐ More tasks / responsibilities
- ☐ Fewer tasks / responsibilities
- ☐ New, unknown situation
- ☐ Worker / management relations
- ☐ Aversity to risk
- ☐ Complex process / regulations
- ☐ Other:.....

## SPECIFIC RESULT

- ☐ Increase ... in such a way that ...
- ☐ Decrease ... in such a way that ...
- ☐ Develop ... in such a way that ...
- ☐ Stop ... in such a way that ...
- ☐ Start... in such a way that ...
- ☐ Continue ... in such a way that ...
- ☐ Strengthen ... in such a way that ...
- ☐ Weaken... in such a way that ...
- ☐ Satisfy ... in such a way that ...
- ☐ Invest in ... in such a way that ...
- ☐ Produce ... in such a way that ...
- ☐ Reduce ... in such a way that ...
- ☐ Other:.....

## MEASUREMENT

### Measurement Instrument

- ☐ Financial Business Case
- ☐ (Flash) Survey
- ☐ Community vote
- ☐ Self-assessment
- ☐ Interviews
- ☐ Process lead times
- ☐ Project status reports
- ☐ Customer satisfaction measurements
- ☐ Turnover
- ☐ Profitability
  
- ☐ Other:.....

### Measurement Frequency

- ☐ Never
- ☐ Yearly / Quarterly / Monthly / Weekly /  
Daily / Hourly
- ☐ Continuous / Real time / Always
- ☐ Regularly
- ☐ Irregularly
- ☐ On demand
- ☐ Batch
- ☐ End of project / process stage
- ☐ Randomly / At will
  
- ☐ Other:.....

# The Transformation Intervention Process<sup>©</sup> - Step

**by Step**

Is the result worth the cost?  
Whichever intervention we choose, it will come at a cost, in time, money and attention. A balanced consideration of resources and effects has to be made. If an intervention seems too expensive, a simpler, more efficient way can usually be found!

**Where does our intervention fit in?**

No transformation will succeed by using a single intervention. Also, in many organisations, different initiatives coincide.

Every intervention should be viewed as part of a bigger whole. So interventions should be consistent, diverse but aligned

## CHOICE of INTERVENTION

### Scale of intervention

- ☐ Society
- ☐ Large scale
- ☐ Company wide
- ☐ Department focused
- ☐ Team focused
- ☐ Small scale
- ☐ Individual

☐ Other:.....

### Main goal of intervention

- ☐ Inform
- ☐ Interact
- ☐ Inspire
- ☐ Teach skills / knowledge
- ☐ Collaborate
- ☐ Social
- ☐ Engage
- ☐ Convince / Change belief
- ☐ Provoke

☐ Other:.....

### Main mode of communication

- ☐ Online information (e.g. wiki, newsletter)
- ☐ Real life information (e.g. presentation)
- ☐ Online interaction (e.g. Intranet)
- ☐ Social (e.g. Yammer)
- ☐ Collaboration tools (e.g. Trello, MS Teams, Hype, Bright Idea)
- ☐ Mouth to mouth
- ☐ Real life dialogue
- ☐ Physical attributes - interactive (e.g. games)
- ☐ Physical attributes - informative (e.g. posters, billboards)

☐ Other:.....

### Time frame

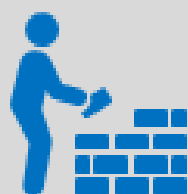

- ☐ One time
- ☐ Continuous
- ☐ Intermittent
- ☐ Limited period
- ☐ Long campaign
- ☐ Regularly
- ☐ Incidentally
- ☐ Sprints
- ☐ Consecutively

☐ Other:.....

## RESOURCES

- ☐ Venues / facilities
- ☐ Food and beverages
- ☐ External guests
- ☐ Materials
- ☐ Travel cost
- ☐ Hours of organizers / facilitators / management / participants
- ☐ Replacement cost of participants (e.g. in customer service)
- ☐ Promotion costs
- ☐ Consultancy
- ☐ Design
- ☐ Site/ App
- ☐ Approval / Liberty to act
- ☐ Promotion space
- ☐ General budget
- ☐ Trust
- ☐ Humour
- ☐ Other:.....

## CONSISTENCY

- ☐ Same strategic goal, new way
- ☐ Same challenge, new way
- ☐ Same target audience, new way
- ☐ Similar intervention, new strategic goal
- ☐ Similar intervention, new challenge
- ☐ Similar intervention, new target audience
- ☐ First intervention in new effort
- ☐ Aligns with corporate comms/design
- ☐ Aligns with other change initiatives
- ☐ Aligns with strategy
  
- ☐ Other:.....

# The Transformation Intervention Process<sup>©</sup> - Step by Step

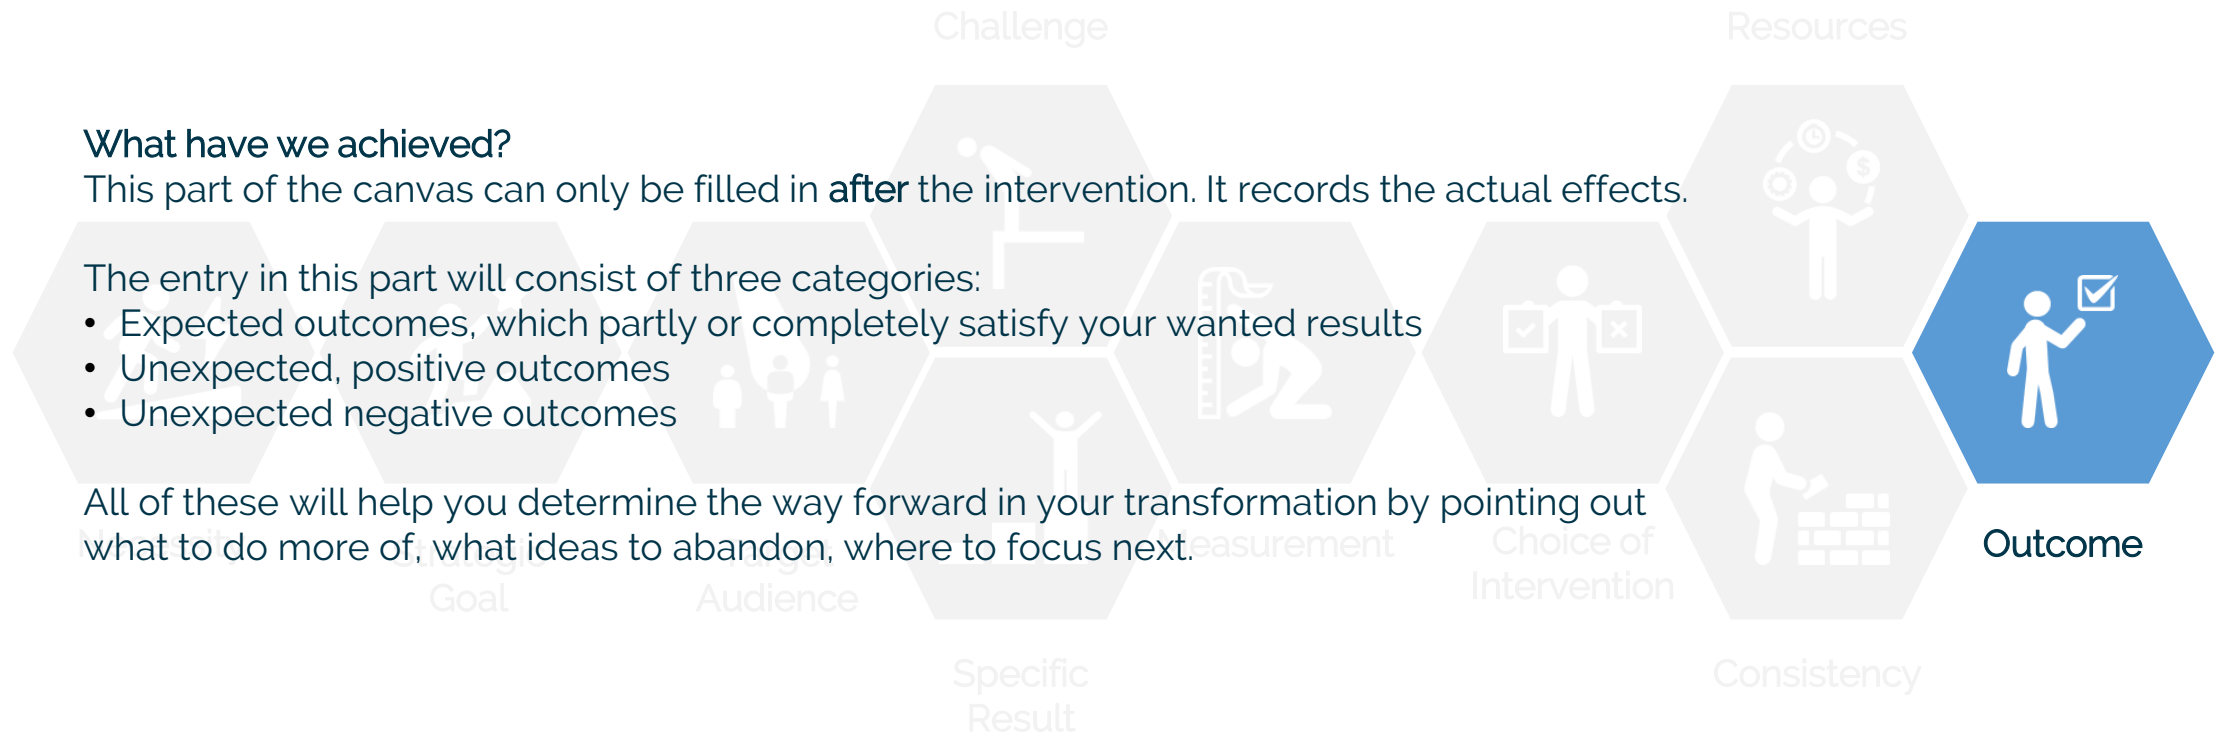

## What have we achieved?

This part of the canvas can only be filled in **after** the intervention. It records the actual effects.

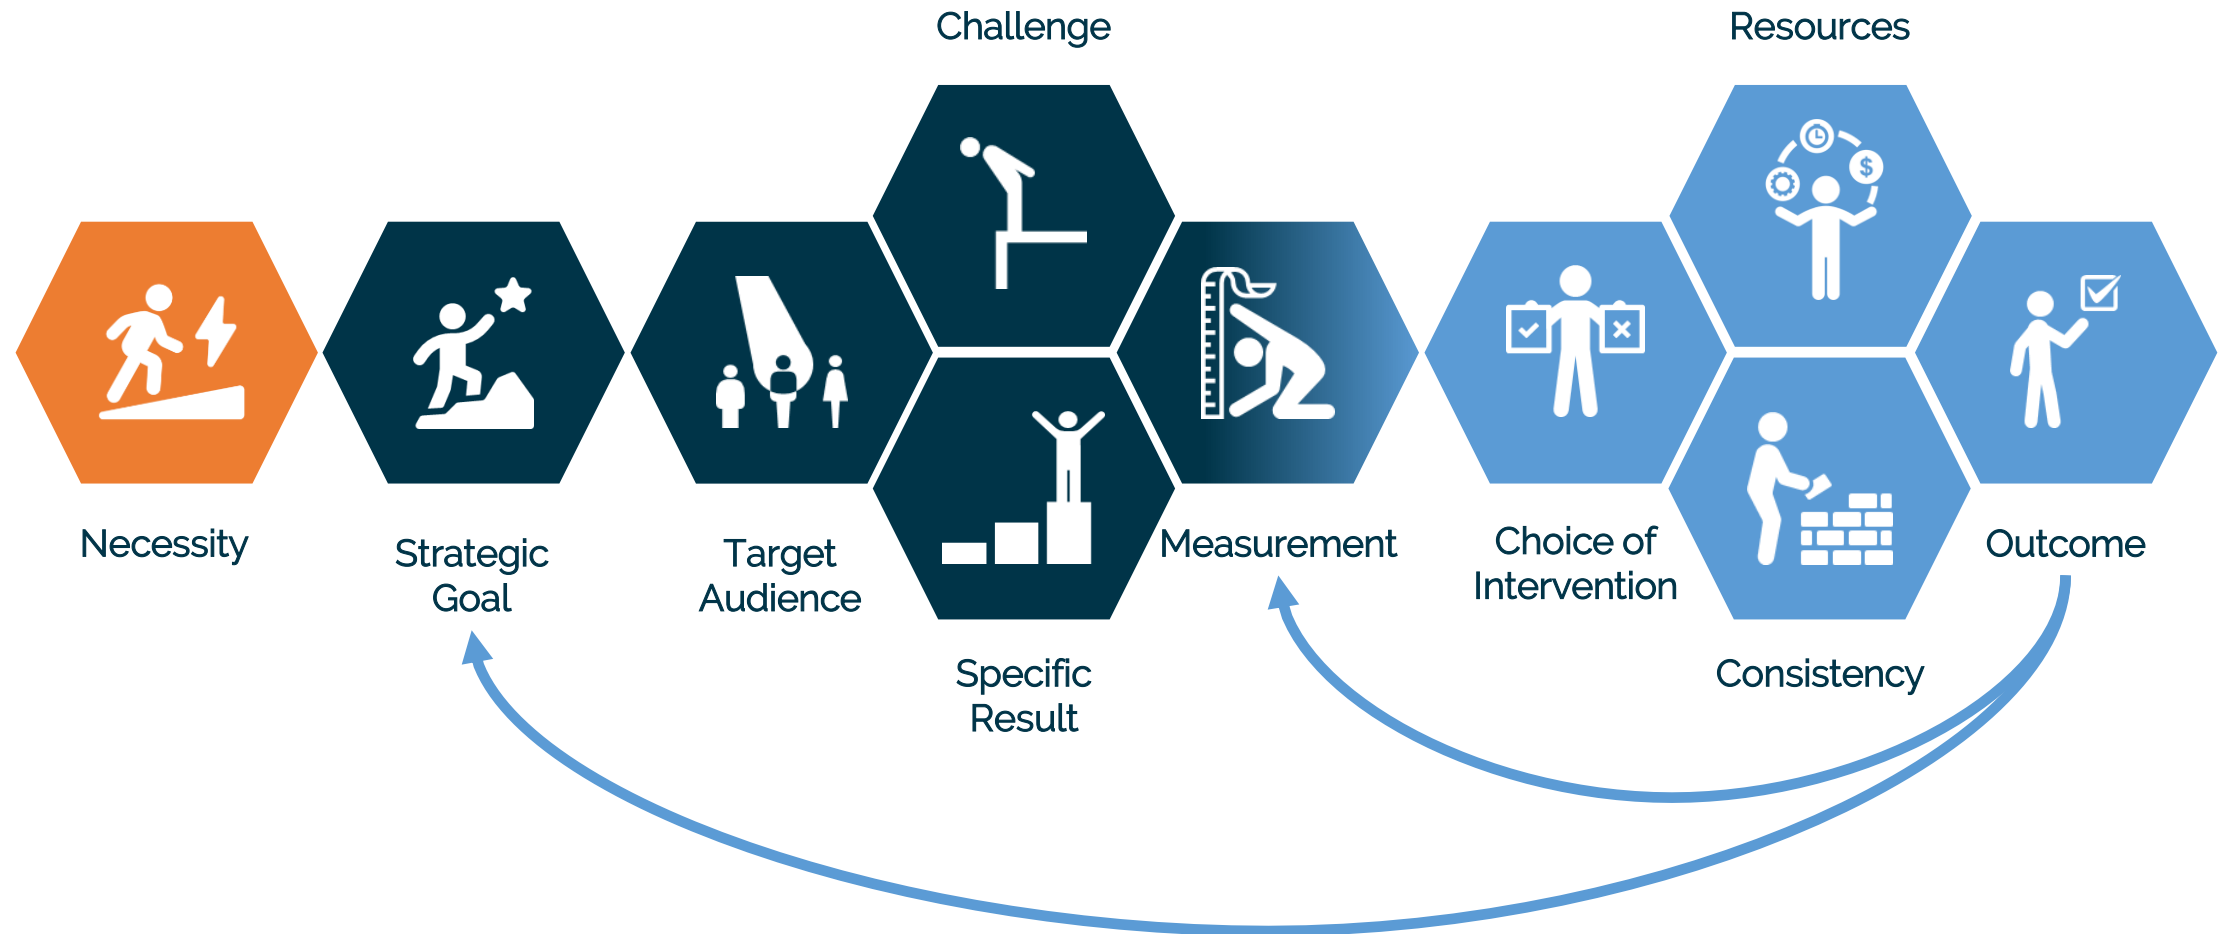

The entry in this part will consist of three categories:

- Expected outcomes, which partly or completely satisfy your wanted results
- Unexpected, positive outcomes
- Unexpected negative outcomes

All of these will help you determine the way forward in your transformation by pointing out what to do more of, what ideas to abandon, where to focus next.

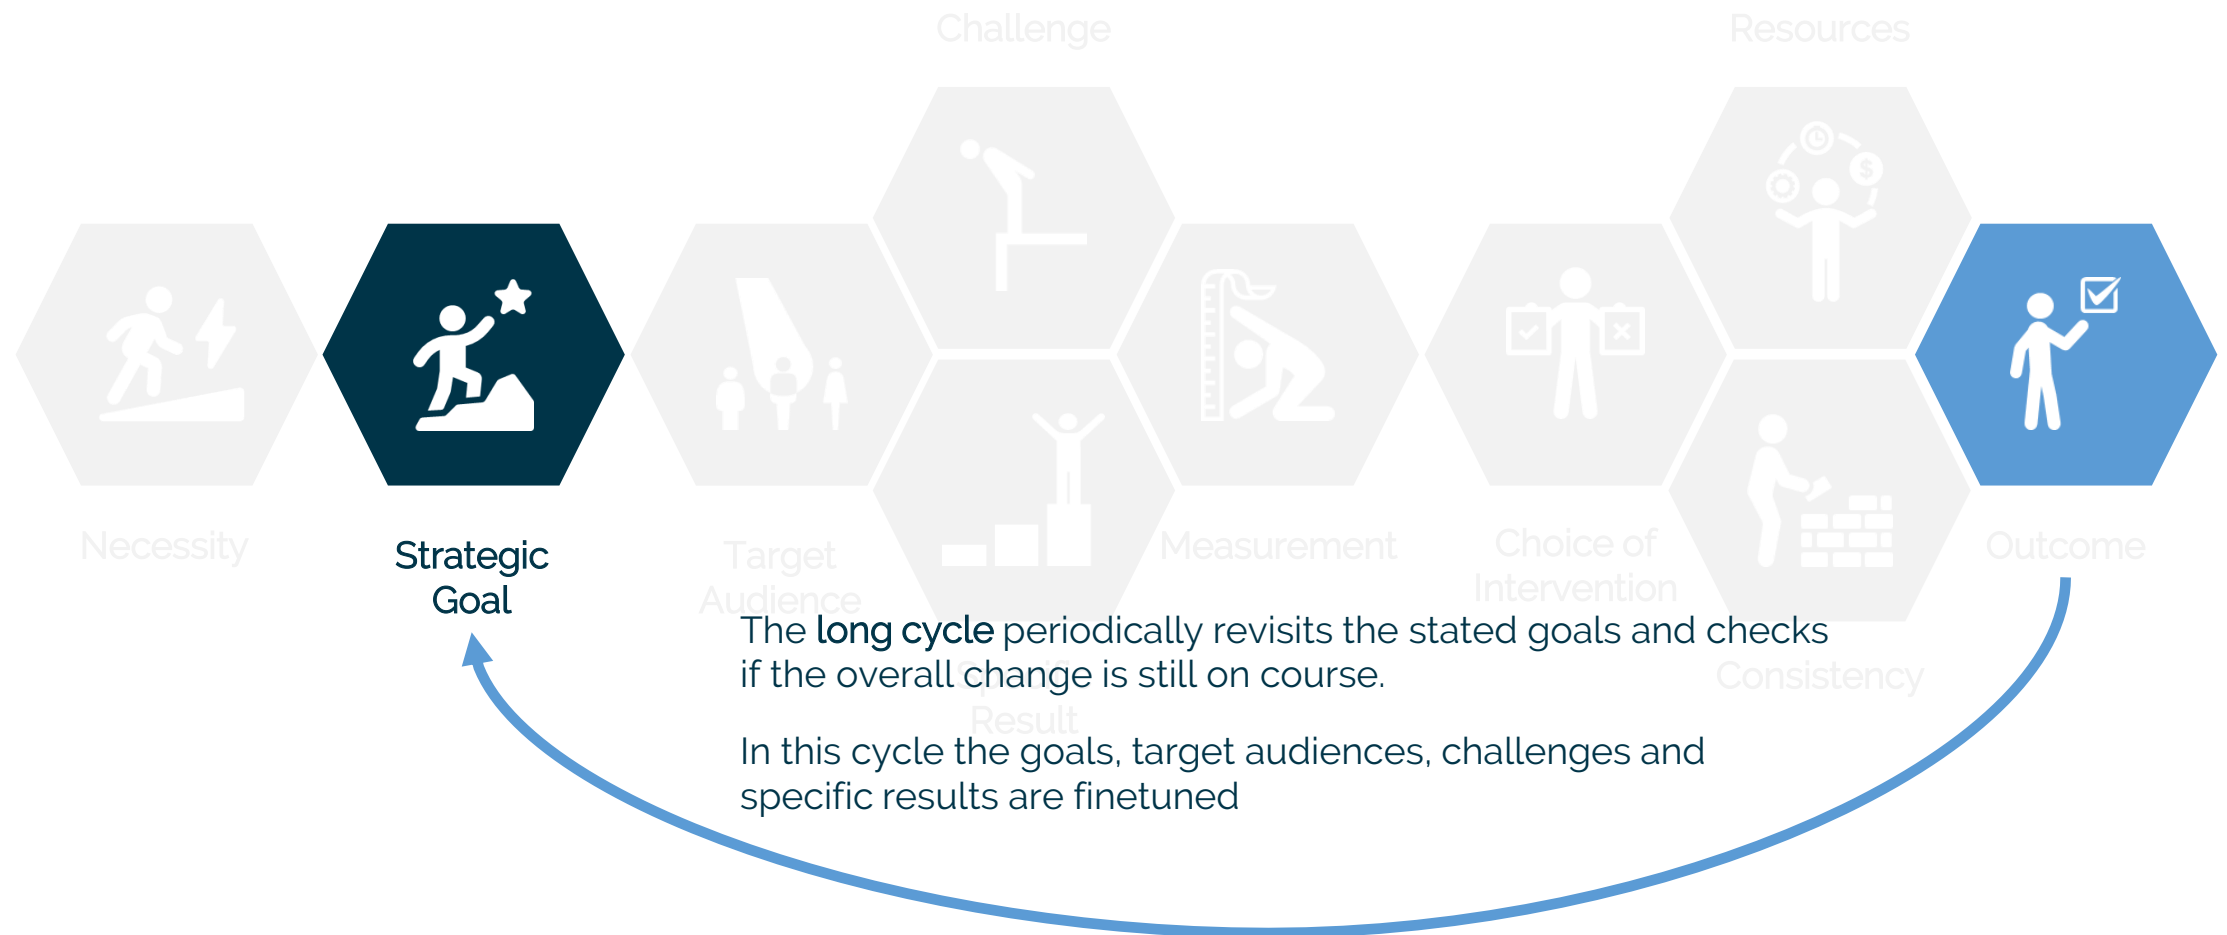

# Cycles in designing transformation interventions

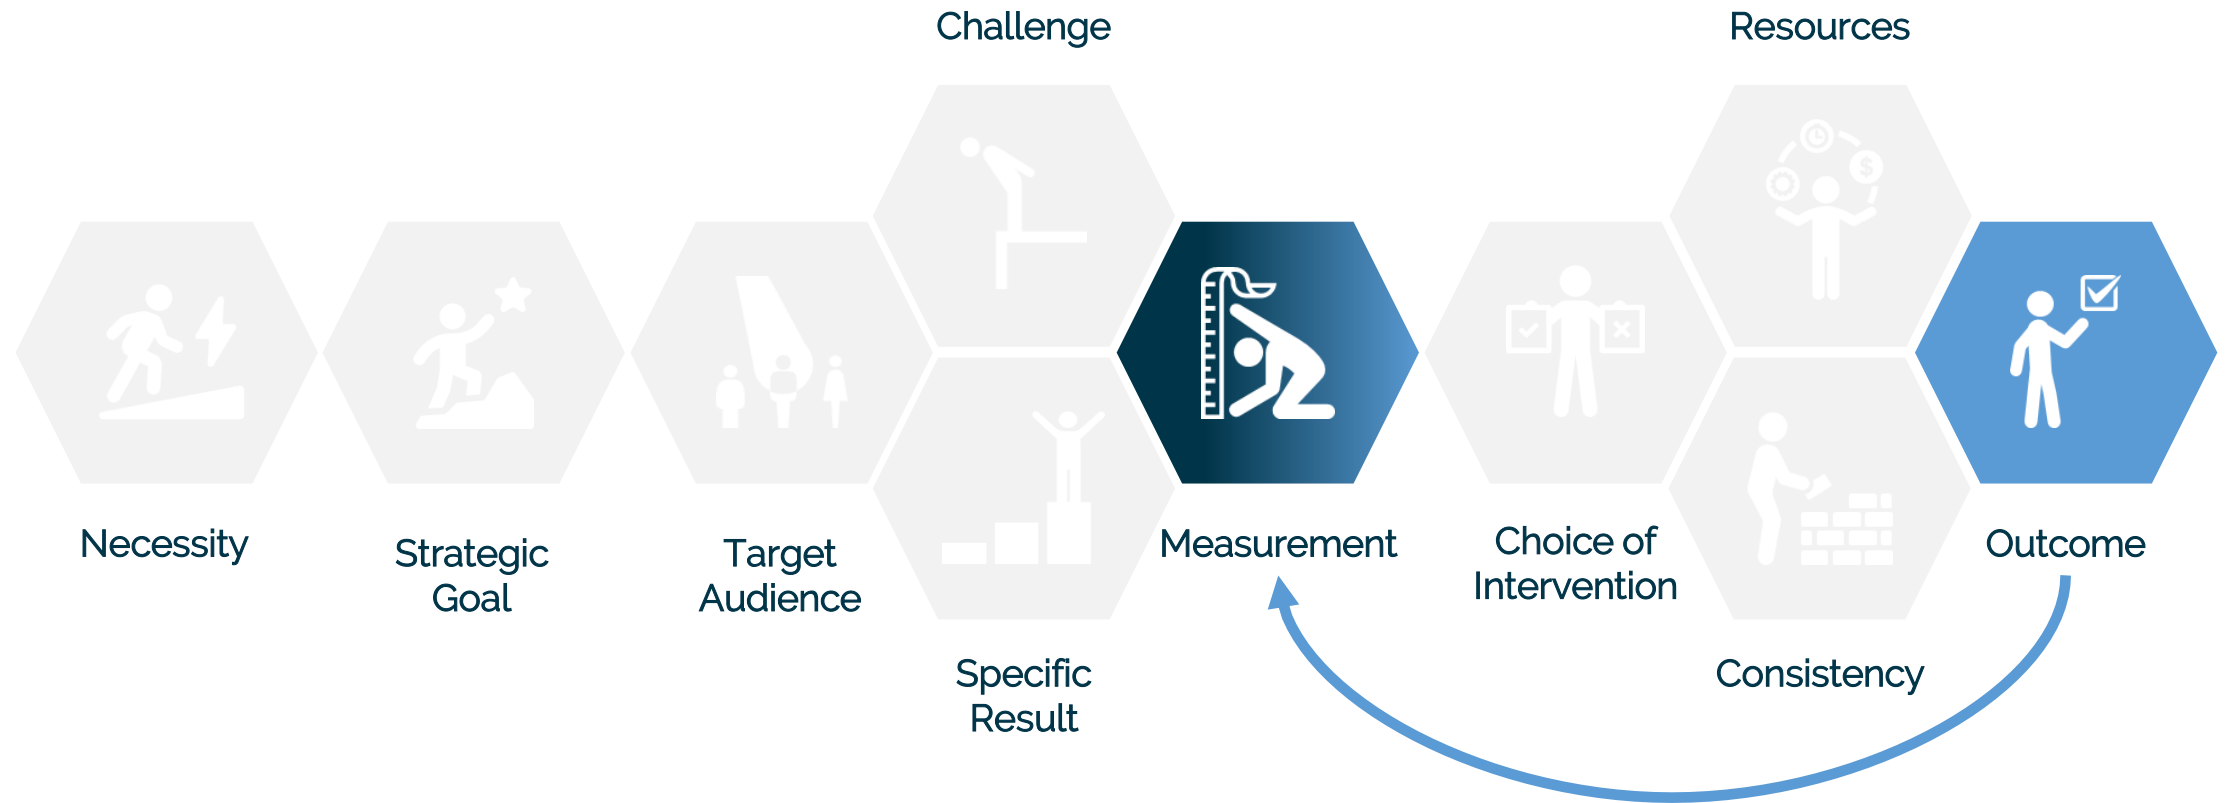

# Cycles in designing transformation interventions

Transformation is all about learning. To create lasting change, introduce cycles in your intervention design:

# Cycles in designing transformation interventions

The **short cycle** operates on the level of specific interventions. Here, we adapt, discard and add interventions based on their outcomes in practice

# The Transformation Intervention Canvas<sup>®</sup>

The Transformation Intervention Canvas<sup>®</sup> is a practical tool to design your own interventions.

The canvas guides you through the Transformation Intervention Process, providing common options for each step as well as a selection of suggested interventions

The full set also includes a set of printed checklists to enable change managers to design interventions quickly
