

POSTMASTER DIGITALE INNOVATIE, AI & CHANGE

DATA MODELLING, STRATEGIE & ORGANISATIE

INTRODUCTION

Frank van Delft

- Hotel management, Hospitality Business School The Hague
- Quantitative business economics, Erasmus University Rotterdam
- Information technology, HIO/HTS The Hague

- Marketing Marketing Director Europe Quaker Oats
- Data Managing Director AC Nielsen Benelux
- Communication Co-Owner KHY, Direct Marketing communication, Strategy Director Publicis Dialogue

- Education Director NIMA, Lecturer Business schools
- Customer Value driven Business Founder and co-owner (www.cim7.nl - fd@cim7.nl)

Supports companies in creating value with (big)data, since 2012

DATA MODELLING, STRATEGIE & ORGANISATIE

● Innovatie

Bedrijven struikelen over hun chaotische data op weg naar AI-succes

Bedrijven die hopen met kunstmatige intelligentie snelle winst te boeken, lopen al snel tegen een banalere klus op: hun data opruimen. Zonder veel en goed gestructureerde data, valt met AI weinig te beginnen. En juist daaraan ontbreekt het bij de meeste organisaties. 'Het duurt nog jaren voor we de vruchten van AI gaan plukken.'

SANDRA OLSTHOORN

AGENDA

- | | | |
|---|-----------------|----------|
| A | 3 Preconditions | (40 min) |
| B | Strategy | (15 min) |
| C | Building blocks | (90 min) |
| D | Business case | (15 min) |

The background features a dark space filled with vibrant, multi-colored particle trails in shades of blue, green, orange, and red, creating a sense of dynamic movement and data flow. A large, solid yellow circle is positioned on the right side of the image, serving as a container for the text.

A

**Data driven:
3 Preconditions**

1. CUSTOMER VALUE: Customer Experience & Customer Value

Maximise Customer Experience (V2C) & Customer Value (V2F)

TASK

In welk kwadrant
passen
deze merken?

Kpi's for V2C & V2F

	Value to Customer (V2C)	Value to Firm (V2F)
Product Market Combination (PMC)	 Product awareness Product attractiveness	 Market volume/size Market growth
Brand	 Brand consideration Brand likes/comments	 Brand/market share Brand Equity
Customer / Customer Relations	 Net Promotor Score (NPS) Reviews: volume & valence	 Customer Lifetime Value Marketing ROI

2. PHASING: Data Driven Business - Levels in organisations

		Niveau I	Niveau II	Niveau III	Niveau IV
A	Ambitie-niveau	Niet of nauwelijks big data ambitie voor marketing en sales	Optimalisatie van commerciële activiteiten met big data	Data als vertrekpunt voor commerciële processen	Data zijn de grondstof voor de business
B	Organisatie	IT is de baas over big data	Verschillende afdelingen, ieder voor zich	Centraal eigenaarschap waarbij 'data driven' de standaard is	Big data als essentie van het business-model
C	Kennis	Beperkt	Datamanagers en analisten: beschrijvende en verklarende analyses	Idem niveau II + econometristen: voorspellende analyses	Organisatie ontwikkelt zelf tools, modellen en toepassingen

2. PHASING: Data Driven Business - Levels in organisations

		Niveau I	Niveau II	Niveau III	Niveau IV
D	Typen data	Kwantitatief en kwalitatief onvoldoende data	Datakwaliteit in ontwikkeling, beperkte koppeling tussen data	Datakoppeling van alle relevante bronnen	Data exploitatie vanuit alle relevante bronnen
E	Analyse technieken	Rechte tellingen primair gericht op financiën	Beschrijvende en verklarende analyses	Voorspellingsmodellen; start automatische algoritmes	Doorontwikkeling automatische algoritmes
F	Tooling	o.a. Excel en Google Analytics	Start 'self service business intelligence' met o.a. Tableau	Tooling platform en data ecosysteem (bijvoorbeeld Cloudera)	Doorontwikkeling van het data ecosysteem

TASK

Waar staat jouw organisatie op het gebied van 'data driven business'?

2. PHASING - Data Driven Business - Levels in organisations

Phasing in implementatie centraal

2. PHASING: 5 Waves in 'Data and analytics strategy for business'

How data and analytics
can grow your business

- 1. How this book can help
- 2. Business case for data
- 3. Your data and analytics strategy
- 4. AI strategy
- 5. A team game

Wave 1
Aspire

- 6. A quick win
- 7. Repeat and learn

Wave 2
Mature

- 8. Data governance
- 9. Data quality
- 10. A single customer view
- 11. Generating insights
- 12. Data risk management and ethics

2. PHASING: 5 Waves in 'Data and analytics strategy for business'

Wave 3 Industrialize

- 13. Automation, automation
- 14. Scaling up and scaling out
- 15. Data and AI culture

Wave 4 Maximize

- 16. The voice of the customer
- 17. Maximizing data science
- 18. Sharing data with suppliers and customers

Wave 5 Differentiate

- 19. Data products
- 20. Right leadership, right time

3. FOCUS & MEASURE

Data driven strategie
& organisatie

7 Stappen

3. FOCUS & MEASURE

Data driven strategie
& organisatie

7 Stappen

3. FOCUS & MEASURE

Data driven strategie
& organisatie

7 Stappen

3. FOCUS & MEASURE

Data driven strategie
& organisatie

3. FOCUS & MEASURE

Data driven strategie
& organisatie

7 Stappen

TASK

Ontwikkel een
loeischerpe
vraagstelling

Maak in duo's een loeischerpe vraagstelling voor
Retaildata Benelux (ca 10 min)

CASE PEUGEOT

Goal:

Increase repurchases Peugeot cars of existing Peugeot Owners
(new and/or top occasions)

CASE PEUGEOT

Goal:

Increase repurchases Peugeot cars of existing Peugeot Owners
(new and/or top occasions)

Questioning:

Reduce the churn with current Peugeot owners
(new or top occasion)
from 62% with at least 10 percent points (branch average)
in 1 year

Data driven strategie & organisatie

7 Stappen

A person is seen from behind, sitting in a control room or data center. They are looking at several computer monitors. The monitors display various data visualizations, including bar charts, line graphs, and tables of numbers. The background is filled with a dense grid of colorful lights, possibly from server racks or other equipment, creating a bokeh effect. A large yellow circle is overlaid on the right side of the image, containing the letter 'B' and the text 'Strategy to create customer value'.

B

Strategy
to create customer value

Strategie: hoe ga je de doelstelling(en) realiseren?

DATA PERIODIC TABLE

A method to assign strategic business goals to data activities. The table highlights those business activities that can, through the use of data, generate business value. It then links those activities to enabling data activities and the data toolkit, and can be used to align data and organizational strategies.

Task: Setting priorities using the data periodic table

FIGURE 3.1 Data periodic table

Where to get value from data											
A–E Business activities	A Increased revenue			B Decreased costs			C Risk	D Strategy		E Compliance

Data toolkit	Dashboards			Reports		Data feeds and APIs		Data science, ML & AI		Alerts & notifications	

A. Revenue increase

- Peugeot

- Recreatie park

• Nieuwsblad

• B2B service provider

A. Revenue increase

- Electronica

- Recruitment

A17. Improved real-time offers and interventions	A18. Improved media coverage	A19. Product placement optimization	A20. Improved alignment of brand image to next generation of customers
A21. Improved customer service	A22. Increased ease and reliability of service	A23. Increased sustainability culture	A24. Improved individual customer messaging on contact
A25. Improved style and channels of customer communications	A26. Improved next best action	A27. Increased ease of customer feedback	A28. Improved complaint resolutions
A29. Improved customer autonomy	A30. Improved customer knowledge	A31. Improved skills and knowledge of staff	A32. Improved staff satisfaction
A33. Improved staff retention	A34. Improved alignment of staff incentives with group strategy	A35. Monetization of data	A36. Marketing performance management

B. Decrease costs

- Woningbouw

B01. Reduced cost to serve	B02. Increased automation of repetitive tasks	B03. Reduced fixed / operating costs	B04. Improved proactive intervention to minimize costs
B05. Reduced credit, risk and fraud losses	B06. Increased collections and recoveries amount recovered	B07. Improved bad debt forecasting and detection	B08. Reduced bad debt
B09. Reduced claims leakage	B10. Improved cost processes	B11. Decreased cost of data and analysis infrastructure	B12. Increased operational efficiency
B13. Improved credit and risk insight	B14. Improved credit and risk early warning	B15. Improved credit and risk capital adequacy	B16. Improved credit and risk channel optimizations

B. Decrease costs

- **Banken**

B17. Improved credit scoring	B18. Improved standardized reporting and measurement	B19. Supplier optimization	B20. Improved fraud detection
B21. Reduced 1st-party fraud	B22. Reduced 3rd-party fraud	B23. Reduced claims fraud	B24. Reduced application fraud
B25. Reduced card fraud	B26. Increased customer self-service	B27. Improved incentives for customers to reduce costs	B28. Reduced number of high- / medium-cost accounts
B29. Reduced non-profitable customers	B30. Reduced dormant accounts	B31. Distribution optimization	B32. Improved stock management

C. Reduce risks

C01. Improved risk decision-making	C02. Improved cross-group relationships exposure	C03. Improved identification of corporate / sector risk exposure	C04. Reduction in data privacy risk
C05. Reduction in insurance risk	C06. Reduction in regulatory risk	C07. Improved data ethics	

D. Strategy

- Cosmetica

D01. Improved risk decision-making	D02. Deeper macro-economic insights	D03. Improved identification of opportunities	D04. Improved understanding of impact of emerging customer behaviour
D05. Improved identification of macro trends	D06. Deeper insights into attitudinal sector trends	D07. Improved insights and forecasting on emerging trends	D08. Insights into competitor trends

E. Compliance

E01. Reduction in compliance claims	E02. Better compliance insights	E03. Better compliance risk detection
-------------------------------------	---------------------------------	---------------------------------------

F. Enabling capabilities

- Retaildata

- Goed Doel organisatie

F01. Increased use of external data	F02. Increased use of internal data	F03. Increased use of all onboarding data	F04. Incentives for customers to provide more data
F05. More consistent data capture	F06. Improved quality of customer data	F07. Increased use of structured data	F08. Increased use of unstructured data
F09. Improved data methods and processes	F10. Improved data governance	F11. Increased understanding and insight of customers	F12. Increased no of contactable customers
F13. Single customer view	F14. Improved use of historical dialogue customer data	F15. Improved modelling accuracy	F16. Reduced modelling development and production time
F17. Improved use of data science models	F18. Data science models embedded in downstream systems and op processes	F19. Improved analytics tools	F20. Real-time streaming data architecture

F. Enabling capabilities

F21. Improved use of artificial intelligence	F22. More accessible data	F23. Improved use of machine learning	F24. Reduced time taken to access data
F25. Improved transactional data analysis	F26. Improved event detection for rules-based decisioning	F27. Improved real-time decisioning	F28. Improved data team skills
F29. Stronger analytics community	F30. More knowledgeable data community	F31. More data-aware exec	F32. Improved data ethics
F33. Improved data sets for teaching models			

CASE PEUGEOT

Questioning:

Reduce the churn with current Peugeot owners (new or top occasion) from 62% with at least 10 percent points (branch average) in 1 year

Strategy:

- Predict Peugeot drivers with **highest churn probability** using predictive analytics and
- Predict the **most likely reason** for the specific Peugeot driver.
- **Communicate** with the targeted Peugeot drivers the 'most likely offer' based on the churn reason and other information that is available and relevant.

PASSIVE traditional		

Big Data challenge

Big Data impact

Enormous impact of big data

- Samples → Full population
- Significance → Substantive / size
- Ad-hoc → Continuous data collection

- Van precisie naar rommelig

- Black Swan
(Mediocristan & Extremistan)

- Van causaliteit naar correlatie
(google flu trends)
- Altijd correlaties
(M is aantal variabelen,
N aantal datapunten per
variabele)

Big Data impact

#Brexit explained: it's mad cow disease!

Big Data impact

Enormous impact of big data

- Standard → Computer science models
- Ad hoc → Real time models

- Marketing automation
- Personalisatie
- Algoritmes
- Machine learning

TASK

Welke 'bewerkingen'
kan je met data doen?

Verzin samen met je buur 2 bewerkingen.

Data driven business - defining the type of analysis

Onderzoek verband tussen data

Voorspel een waarde
(afhankelijke variabele)

Verdeel data in homogene groepen

Classificeer/sorteer items in groepen

Cluster onderliggende variabelen
tot betekenisvolle waarden

Wat is de beste actie
naar iedere klant (gepersonaliseerd)?

Ontwikkel een geautomatiseerd systeem
wat gepersonaliseerde communicatie genereert

Actionable understanding of the Customer

More specific, based on Customer Intelligence as the result of research & data analysis

Actionable understanding of the Customer

Creativity and Sector knowledge indispensable for creation Customer Insight

Actionable understanding of the Customer

Actionable understanding of the Customer

TASK

Customer Insight

Feit:

34% van de gebruikers van soap uit blik voegt nog verse ingrediënten toe aan het product

Wat zegt dit?

Actionable understanding of the Customer

Feit:

34% van de gebruikers van soep uit blik voegt nog verse ingrediënten toe aan het product

Interne context: is de opdrachtgever....

- een soepfabrikant
- een fabrikant van kant-en-klare groentepakketten
- het Voedingscentrum
- de consument

Externe context: waarom?

- Is uit blik niet lekker genoeg?
- Is soep uit blik niet gezond genoeg?
- Vindt de eigen prestatie in de keuken onvoldoende en wil zo toch iets bijdragen?

Waarde creatie met 'Data Driven' strategie

Block 5: Organisation & Culture

Organisation & Culture

1. Ambition
2. People; Skills & team profiles
3. Culture
4. Knowledge & experience
5. Data driven culture
6. Development

1. Ambition

Ambition & Commitment lead process

	Niveau I	Niveau II	Niveau III	Niveau IV
Ambitie-niveau	Niet of nauwelijks big data ambitie voor marketing en sales toepassingen	Optimalisatie van commerciële activiteiten met big data	Data als vertrekpunt voor commerciële processen	Data zijn de grondstof voor de business

Ambitie minimaal 1 niveau boven de rest

2. Data driven Culture

2.1. Personality biggest challenge for data-driven culture

- Analytic & Creative
- Slightly Nerdy (interested in technology and/or programming)
- Curious
- Critical attitude
- Failure as a learning opportunity
- Mindset as a startup

2. Data driven Culture

2.2. Co-operation

Box 5.2 Views on the marketing intelligence process

Marketing Intelligence:

- *“Marketing does not understand that answering a simple question takes a lot of work for us”*
- *“We recently did a great analysis, but nothing is done with it”*

Marketing:

- *“Marketing Intelligence has written a wonderful extensive report, but the report does not really answer my question”*
- *“I am convinced that the results are significantly reliable, but I do not see how I can apply this in practice”*

3. People - Skills

Analytical capabilities

- Excellent conceptual, analytical and numeric skills
- Statistical modelling & Experiment design
- Supervised learning: decision trees, logistic regression
- Unsupervised learning: clustering, dimensionality reduction

Data & Tools

- Curious about data and sources
- Computer science fundamentals
- Statistical computing package e.g. R, Matlab, SAS, IBM (SPSS)
- Database tools like SQL and NoSQL
- MapReduce/Hadoop concepts

Business sense

- Willingness to improve business performance
- Deep industry specific knowledge
- Organization sensitivity
- Leadership qualities
- Problem solver
- Engage with senior management

Communication & Visualization

- Translate data-driven insights into decisions and actions
- Define and support your key-message
- Story telling skills
- Consistency and structure
- Visual art design

3. People - Team profiles

The 'consultant'

The 'data-specialist'

The 'data-analyst'

The 'IT-professional'

4. People - Knowledge & Experience

5. Data driven Development

Stepwise development of analytic competences in the organisation

5. AI accelerating the development

**De uitdaging is om de energie van de werkvloer te
behouden, maar die te
kanaliseren richting projecten die écht impact hebben.**

- Frans Muller, CEO Ahold

Source: AI & DM trendrapport 2026 - Bart Meerdink -Beeckestijn Business School

5. AI accelerating the development

1) **Breng de werkelijkheid in kaart**

- Vraag teams eerlijk welke AI-tools ze nu al gebruiken, ook buiten de officiële lijst
- Maak daarvan een inventarisatie: waar zit risico, waar zit goud?

2) **Regel de basis: beleid & kaders**

- Stel een kort, praktisch AI-beleid op (max. 2–3 pagina's):
- Koppel dat aan de opkomende AI Act-verplichtingen

3) **Ontwerp een adoptieprogramma, geen eenmalige e-learning**

- Combineer live sessies en inspiratie met werkplekcoaching en challenges
- Laat teams concrete cases bedenken en prioriteren (campagne, rapportage, klantonderzoek) en meet de impact

4) **Kies waar je centrale regie wilt op agents**

- Bepaal welk platform 'de thuisbasis' wordt voor het maken van agents en workflows
- Werk met rollen: wie mag bouwen, wie mag publiceren, wie bewaakt de kwaliteit?

5) **Maak AI tot dagelijkse buddy**

- Voer buddy-systemen in teams in, leer van elkaar
- Werk met interne prompt libraries
- Zorg voor duidelijke veiligheid- en datarichtlijnen
- Bepaal realistische KPI's zoals tijdwinst en foutreductie

Source: AI & DM trendrapport 2026 -
Bart Meerdink -Beeckestijn Business School

5. AI acceleration and roles

Actieve, innovatieve voortrekker. Pioniert met AI, experimenteert en deelt kennis.

Praktisch ingestelde professional, gericht op resultaat en efficiëntie. Past AI toe in werkprocessen.

Nieuwsgierige beginner, zoekt naar mogelijkheden en inspiratie. Probeert AI vooral privé uit.

Kritische, analytische denker. Wil AI pas gebruiken als het betrouwbaar en ethisch is.

Ervaren medewerker, stabiel en terughoudend. Gebruikt AI nauwelijks, zoekt praktische uitkomsten.

Data driven strategie & organisatie

7 Stappen

D

Business Case

to create customer value

TASK

'Guestimate' inkomsten

Uit de nieuwe vraagstelling van Retaildata Benelux is de impact op de Customer Value aangegeven.

Hoe kwantificeer je die CV?

Geef daarbij aan over welke periode die impact zal hebben.
Resultaat is een raming van de opbrengsten-kant van de BC

CASE PEUGEOT

Implementation & Results

Improvement Churn by 14 percent points (objective 10 percent points)

Business Case

Business Case

Yearly return

- Reduction churn with 10 percent points (from 62% to 52%)
- Average annual sales of 30.000 cars
- Repurchase increases with 3.000 cars (from 11.400 to 14.400)
- Average gross margin car € xxx.xxx
